

TCG's Newly Enhanced Website Announcement

TCG Consulting proudly announces the launch of our recently enhanced website, re-designed to more effectively communicate our company's service offerings in response to the market, clients' needs and strategic opportunities. Key to the new design and layout is the visual representation of our integrated strategic advisory and management service offerings and how they reinforce engagements across all our practice offerings.

Additionally, the [NEW SITE](#) highlights TCG's innovative value proposition by introducing and leveraging our fundamentally disruptive approach to program optimization - Total Cost of Ownership for Travel, Meetings, Payment and ExpenseSM. The TCO-TMPESM model not only delivers superior cost take out, but also delivers value in many areas which support client strategic imperatives - Enhanced User Experience, Streamlined Processes & Workflows, Reduced Risk, Superior Reporting and Program Oversight, etc.

Features of the upgraded site include:

- Detailed messaging on TCO-TMPE^(SM) as well as an introduction to our new Strategic Enabler (SE) strategy for suppliers
- Animation and rotating banners
- Better visual communications and positioning of the importance of aligning all program components as part of the TCO-TMPE integrated client delivery model
