603-226-4789 | jennifer@abcnhvt.org

Who should attend?

Foremen | Supervisors | Field Personnel

What you will learn:

- Health Hazards
- Implement Table 1
- When and how to conduct exposure monitoring
- Preparation of written exposure control plan
- What exposure and medical surveillance documentation must be maintained
- What to look for on a job site to ensure compliance with the silica rule

Did you know... About 2.3 million workers are exposed to respirable crystalline silica at work, including 2 million construction workers who drill, cut, crush, or grind silica-containing materials such as concrete and stone.

Did you know... Exposure to crystalline silica can cause:

- ◆ Silicosis
- ◆ Lung Cancer
- ◆ COPD (*the 3rd leading cause of death in the United States*)
- ◆ Kidney Disease

OSHA estimates that the rule will save over 600 lives and prevent more than 900 new cases of silicosis each year, once its effects are fully realized. The Final Rule is projected to provide net benefits of about \$7.7 billion, annually.

Presenter: **Harald Carlson**, MBA, ARM, CRIS, LEED AP Harry has over 25 years of direct loss control/safety experience. In addition to serving as an OSHA 500 instructor, he provides corporate risk assessments, on-site safety consultation and survey, safety program evaluations, safety training, program development. He is frequent instructor for Gould Construction Institute ABC.

***Concord programs are held at the ABC Education Center. See reverse for directions.
Confirmation notices will be sent within one week of the program start date.
Cancellations within 48 hours may be subject to a cancellation fee.**
