North Branch Construction Completes New Mascoma Community Health Center

(Canaan, NH) North Branch Construction of Concord has completed construction of the new Mascoma Community Health Center in Canaan, NH. The new single-story, 13,280-square-foot facility is located at the corner of Roberts Road and Route 4 and is now welcoming patients from the communities of Canaan, Dorchester, Enfield, Grafton, and Orange. The center contains several exam rooms, offices, a pharmacy, phlebotomy lab, and nurse triage; and will provide many much-needed services to the area including general exams, dentistry, radiography, behavioral health, bariatrics, nutrition and diabetes education, and physical therapy and rehabilitation. This comprehensive primary care facility is the flagship location for the new community owned and operated Mascoma Community Healthcare, Inc.

Mascoma Community Healthcare is a non-profit organization developed with a mission to promote health in its communities with a health center that draws local resources together to provide personal, affordable, accessible, and quality care. The location of the new facility accommodates many communities that are not in close proximity to comprehensive medical care services. Stratton Brook Associates of West Simsbury, CT provided design for this project.
