

Lunar Cycle Activity

Use this notebook to describe the lunar cycle for a 29 day period. Every night go outside to look at the moon. Write the date at the top of the page, and a description of what you see. Then draw a picture of what the moon looks like. You will need to make additional copies of page 2 to complete this project.

School Age Silly Science Activity: Kindergarten – 4th grade

Draw a picture of what the moon looks like today and write a brief description

(i.e. color, size, how high or low it looks in the sky, etc.)

Date _____
