

# Plug-in Electric Car Day at UUCW

Craig Van Batenburg and friends are doing a “Teach-in” for anyone that wants to fight climate change. **With our environmental laws being reversed you may ask yourself “What can I do?”** More than you know and for less than you may think. **Did you know a used EV sells for less than \$10,000?** New EVs go over 200 miles on one charge? The US Government (may change soon) has rebates up to \$7,500 and Massachusetts will send you a check for \$2,500.

**When:** May 7, 2017 – Sunday 2pm to 5pm

**Where:** UU Church 90 Holden Street Worcester, MA

**Cost:** Bring a dish for a pot luck late lunch or donate what you can

## **Schedule of events;**

**2 to 3pm:** Food, visit with speakers, look at plug-in cars

**3 to 4pm:** Speakers will address issues of Climate Change, Oil dependency, Clean Energy, UUCW’s solar panel project and Electric Cars and Plug-in Cars. There will plenty of time for Q & A.

**4 to 5pm:** Meet with car dealers, both new and used, to get to know what is available. See the cars on display. No selling will be done. This event is educational.

**This event is Brand Neutral. We are not promoting any one car.**
