Texas A&M Forest Service (TFS) is hosting listening sessions across Central and West Texas to better understand the issues, concerns, and opportunities landowners, land managers, and resource professionals have regarding natural resource management in Texas. The conversations held at these workshops will help TFS focus and deliver programs that provide better service to Texans.

Your views are important to us and we hope you will be able to attend one of the sessions. All sessions will run from 9:30 am – 1:00 pm and will include lunch.
