## Entrepreneurship: How to Build and Tell Your Business Story

We all dream of working for ourselves; of being our own boss. Some of us dream of being the next Mark Zuckerberg, others just want to run a successful landscaping business or dry cleaners. Regardless of what your entrepreneurial dream may be there's no getting around two things: 1) your business has to make sense (you have to identify and serve a willing, sustainable market); and, 2) you're going to have to do one of the hardest, scariest things in the world: ask for money. This course teaches you how to tell your one-of-a-kind, business story in a way investors – whether they're family, friends, a bank, or a Silicon Valley venture capitalist – appreciate.

**Week 1:** Value Proposition: Who is your market and how will you win them over?

**Week 2:** Model and Pro forma: The math behind your business.

**Week 3:** The Pitch Deck: Telling your story in a way investors will appreciate.

**Week 4:** Pitch Night: Your pitch a panel of local investors/business pros.

The course is taught by **Will Gardenswartz**, a successful entrepreneur and MBA from The Wharton School of the University of Pennsylvania. \*Students must know how to make a PowerPoint presentation and use Excel

It's also a fun way to communicate with people around the world. Students will learn the basics of amateur radio, including how to use and operate different kinds of hand-held radios, how to use the Baldy-Galena repeater system, and how to follow regulations and radio etiquette. This class is open to people who work or volunteer as emergency responders and want to prepare for the FCC licensing exam (to use airwaves), as well as people who may not even have a radio, but want to learn. The licensing exam will be offered on the last day of class.
