

Why make the change to school owned devices? SCS is making the change to school owned devices because there are currently a multitude of iPad models in use at our school. This is problematic because:

- Every iPad is not capable of running the same version of educational apps, programs, or system updates.
- Necessary updates can only be installed on newer iPads, preventing all students from completing an activity or project in the same way.
- Learning time is wasted waiting for apps to download.
- Currently, personal downloaded games, pictures, etc. are a distraction and not necessary in the learning process.
- All iPads are not set with the same restrictions.
- Many iPads have broken screens which never get fixed.
- There is no continuity in the troubleshooting process.
- Many iPads lack necessary storage.

Just as every student receives the same textbook, it's necessary to provide every student with the same electronic device for use in their learning process.
