OCTOBER 25, 2017

### Grades 3 and 4

The last few weeks in third and fourth grade have been full of learning, wonder, and fun. In third grade and fourth grade science. We created the layers of the ocean using what we knew about the density of different liquids. We made a cloud in a jar and created the water cycle (made it rain) in another jar.

Grade three also made pickles with seventh grade students. If you are lucky enough to have tried one you know how delicious they were.

The fourth graders have begun their scrapbooks and are starting to compile photos. (Please share any school photos you may have, even better, hard copies!) We also made a taco and Spanish rice lunch which was delicious! We're eagerly awaiting making Indian chicken kabobs and Indian fries on Monday!

Blessings to all,

Mrs. Joristtma and Mrs. Heenan

### Reminders:

Asian adventure on Thursday 1-2:30. Please invite friends!

This Friday is our trip to the heifer project! Upon return we will have a pj and movie afternoon with a pizza lunch. What a super fun day!
