Hello ISSA Kansas City Members!

Hope you all are enjoying the summer and the last month’s presentation by Daniel Charboneau. Please let us know your thoughts on any topics or feedback on past presentations via secretary@kc.issa.org email.

President-elect for 2016 ISSA International Election is Andrea Hoy and the Directors-elect are Mary Ann Davidson, Rhonda Farrell, DJ McArthur, Shawn Murray and Stefano Zanero.

Please do registrar ahead of time for the ISSA International Conference in Dallas on November 2nd and 3rd.

If you are interested in getting involved or be part of our mentoring program do reach out to me. Also let us know if you would like to volunteer or have topic you would like us to publish in our newsletter.

Sincerely,
Naeem Babri
President, ISSA Kansas City

Upcoming ISSA-KC Monthly Chapter Meeting Schedule

August 25, 2016
ISSA Chapter Meeting
Integrity SRC
Brio’s on the Plaza

September 22, 2016
ISSA Chapter Meeting
Dell
Hereford House

October 27, 2016
ISSA Chapter Meeting
Clarus Group
Lidia’s of Italy
On July 25, 2016, the ISSA-KC Chapter members and other security professionals held a meeting at Rye’s Restaurant to network and attend the monthly chapter meeting, with presentation topic. SPLUNK sponsored the event. The topic discussed was “Security Information & Event Management (SIEM)”. In this breakout, Dan Charboneau with SPLUNK covered SIEM. During this discussion we went through some common benefits other than “filling the compliance checkbox” and gave some great starting points “I have a SIEM, now what do I do with it!” We covered topics such as advanced correlation rules/searches, risk scoring, threat feeds, user behavior analytics and advanced use case development. Each of the topics came with a riveting real world example of something we’ve seen at a client site. We had a great turn-out with 27 members in attendance.

Congratulations to the winner of the ISSA $50 Visa gift card give-away!

Luchidio Fridolin

ISSA KC July 2016 Chapter Meeting

Do not follow where the path may lead.
Go instead where there is no path and leave a trail. Harold R. McAlindon
We Were There
The Interface Kansas City, organized by the F2F Events Inc took place on 21st July 2016 at the Overland Park International Trade Center in Kansas City. The conference covered areas like IT issues through informative, non-sales oriented, educational seminars customized to the specific needs of the local business community. The Kansas City ISSA Chapter was there. The conference was packed with exhibit booths, great learning sessions, keynotes, and attendees.
The Internet of Things will always be Vulnerable

The "Internet of Things", also known as the "IoT". A made up marketing buzzword now used to refer to anything and everything that can connect to the Internet, or at least a local network, that isn't a traditional computer or mobile device. But as dreamy as the idea of being able to command your entire home, as well as your car, with just a few taps on your smartphone or smartwatch, this new trend in consumer electronics does come with some risks. As IoT brings these devices right into our homes and deeper into our lives, they also pose bigger threats to our privacy and security. Because try as we might, the Internet of Things will never be truly and absolutely secure. But that's also alright, because no connected device really is. To learn more click the following link. [http://www.slashgear.com/the-internet-of-things-will-always-be-vulnerable-12451599/](http://www.slashgear.com/the-internet-of-things-will-always-be-vulnerable-12451599/)

CUSTOMIZED FLEX TRAINING FOR ISSA MEMBERS!

Due to the nature of today’s budgets and time constraints, ISSA has partnered with EC-Council to bring a less expensive more flexible Certified Ethical Hacker (CEH) and Certified Chief Information Security Officer (CCISO) course to the ISSA international conference coming up in Dallas! The program will be a hybrid program which will combine video lectures as well as a live instructor-led Exam Prep, Q & A and testing at the conference.

How does it work?
Step 1: Register for the course.
Step 2: Receive immediate access to the asynchronous course and online labs
Step 3: Complete the online course prior to the conference.
Step 4: Attend the Exam Prep/Testing session at the conference.
Step 5: Test onsite at the ISSA International Conference!

CEH Live Exam Prep
Q & A and Testing held Nov. 1st, 2016
CCISO Live Exam Prep
Q & A and Testing held Nov 4th, 2016

What does the program include?
- Instructor Led Streaming Videos
- Live Exam Prep Session/Q & A and Testing at the ISSA Conference
- 6 Months Access to iLabs (not applicable w/ CCISO)
- Exam Voucher
- Test Pass Guarantee (If a student fails the first attempt, EC-Council will cover the next.)
- Physical Courseware

REGULAR PRICE: $3,499
ISSA PRICE: $1,999

2016 Kansas City Tech Security Conference

This conference qualifies for CPE credits!

Passes include a full lunch, entrance into the main conference room and all conference material.

Program Description:
Data Connectors will be hosting the Kansas City Tech Security Conference on Thursday, October 6. The event will start at 8:15 AM with a check-in and opening introductions before presentation sessions begin at 8:45. Between the educational sessions that go throughout the day, there will be time to visit vendor booths to obtain information regarding product and service offerings.

Since 1999 Data Connectors has been dedicated to producing high-quality executive symposiums that focus on driving the future of business in the new age of the digital economy. These conference programs are designed to showcase the broad spectrum of new and emerging information security products and services to solve business’s complex IT security challenges.

These technology security conferences regularly feature 30-60 vendor exhibits as well as 8-12 industry experts from the respective market discussing current issues such as email security, LAN security, wireless security, social media security, cloud security, compliance and more. This format provides excellent educational speaker sessions and tremendous networking opportunities.

Register NOW
ISSA-Kansas August 25, Chapter Event

On August 25, 2016 the ISSA-KC Chapter members and other security professionals will hold a meeting at Brio’s Restaurant on the Plaza to network and attend the monthly chapter meeting, with presentation topic.

Sponsor: Integrity/SRC

Topic: Internet of Things (IoT) – Home Edition

Topic Summary:
The Internet of Things continues to permeate homes, providing for many conveniences and methods for controlling things you see and use on a daily basis, such as appliances, entertainment systems, and home security devices, among others. Some reports cite that connected IoT devices will outnumber smart phones as early as 2018, underlining the rate at which IoT devices are being connected. Though manufacturers are rushing home IoT products to market, touting the capabilities of their products, not all news has been positive. You’ve likely seen reports about connected devices such as baby monitoring systems being hacked and cameras used to spy on families. This presentation will explore some of the latest in home IoT products, news and trends. In addition, home automation standards (or lack thereof) will be discussed, and security and privacy concerns addressed.

Speaker/Bio: Jeff Hudgens, CISSP, CRISC, PMP, ITIL®

Jeff is the Director of Security Consulting at Integrity Technology Systems, where he provides a range of information security, risk, and compliance consulting services to clients across multiple industries, including banking, financial, health, retail, manufacturing, and communications. Prior to joining Integrity, he worked with a large consulting firm, providing contract support for U.S. Government clients and developing products related to military cyberspace operations, intelligence, training, and capabilities. He was also the contract manager for the Department of Defense’s (DOD) Cyberspace Training Initiative (CTI), focused on cyber workforce development; user awareness and training; and cyber exercises, modeling and simulations. In addition to the CTI efforts, he has held roles as a military cyberspace operations policy and plans analyst, IT requirements developer, and cyber security analyst.

Date: Thursday, August 25, 2016 from 11:30 PM to 1:30 PM
