Merritt Hawkins is conducting a national search for one of the Nation’s largest hospitals and research institutions. We seek an Adult or Pediatric Endocrinologist, or other specialties who have had extensive focus in clinical type I diabetes research. The desired candidate will have a track record of research funding from industry or government sources. Your research program will complement an already well-established Type II diabetes research institute.

Some highlights of this opportunity are:

- 54,000 square feet of dedicated diabetes and metabolism research space
- 9-bed dedicated inpatient observation unit for diabetes research
- 3,000 sq.ft. of (CLIA) certified lab space for research, phlebotomy and sample processing
- Dedicated Magnetic Resonance Imaging and Spectroscopy (MRI/S), Dual-Emission X-ray Absorptiometry
- (DXA), and optical spectroscopy for diabetes research
- 4 calorimeter-room units, one of very few found nationwide
- New exercise and bioenergetics laboratory
- Within walking distance of a 1,000+ bed hospital that supports 19 different research institutes
- Diabetes research staff includes 90 total FTEs with 10 PhDs, specialists in nutrition, exercise, and metabolism
- Existing robust clinical research programs include NIH and industry funding
- Collaborative clinical setting partners exercise, nutrition, and metabolic research
- One million dollar Endowed Chair available for the incoming candidate
- Academic appointment opportunities with multiple major Florida universities
- Opportunity to teach residents, if desired
- Excellent guaranteed salary and start-up research package
- Generous protected time for research and administrative duties
- Optional clinical practice could be 100% outpatient
- 2,000 active Type I diabetic patients
- Large service area attracts diverse patient mix and rare pathology
- You will have a dedicated post-doctoral research fellow
Community:

One of Florida’s most beautiful communities voted as the 4th most desirable place to live in the United States. This city has a population of 265,000 and 2.4 million in the metro-area. One hour to the beautiful beaches of the Atlantic and 1.5 hours to the Gulf. The community has a plethora of new and established golf and lake communities with scenic views. The area is also known as a world-class destination for recreation and entertainment. A robust economy, exquisite shopping, excellent public, and private education and the largest university in the country enrich the area to offer a superb quality of living.

In summary—this is an opportunity to jump aboard a world-class research institute to develop Type I Diabetic Research with all the high-tech and high-touch support possible in sunny Florida.
