THE DEPARTMENT OF OBSTETRICS AND GYNECOLOGY AT THE UNIVERSITY OF UTAH IS SEEKING CANDIDATES FOR THE POSITION OF DIRECTOR OF THE DIVISION OF REPRODUCTIVE ENDOCRINOLOGY AND INFERTILITY

The Division of Reproductive Endocrinology and Infertility at University of Utah School of Medicine is conducting a national search for a Director of the Division of Reproductive Endocrinology and Infertility.

We are seeking a candidate who is Board certified in both Obstetrics and Gynecology and Reproductive Endocrinology and Infertility. The ideal candidate will be an experienced, active clinician or clinician-scientist with outstanding clinical skills, leadership qualities, communication and team building skills, a record of teaching and mentoring and a demonstrated research background. The Division Director will provide leadership, oversight, and direction to the faculty, staff, and trainees in clinical care, education and research. The Director will work in a collaborative manner with other members of the University’s clinical, educational and research staff and faculty. Along with the Department Chair, the Division Director will focus on improving, developing, and implementing quality monitoring of all clinical services within the Division. The Director will have fiscal and budgetary responsibilities for the Division and establish goals for quality, productivity, expenses and profit margins. The Director will also have a high degree of autonomy and opportunities to collaborate with clinicians and scientists in designing and conducting reproductive research.

The Department of Obstetrics and Gynecology at the University is an internationally recognized center for women’s health. The Department currently holds two endowed chairs and is staffed by 61 clinical faculty members, 10 advanced practice clinicians, one Ph. investigator and one post-doctoral fellow who train 24 residents and fellows in three accredited fellowships. The Department is routinely ranked among the top 25 Ob/Gyn departments for research in the US. Our unique Obstetrics and Gynecology Network (OGRN) is a research infrastructure consisting of comprehensive administrative support services and a staff of individuals experienced in assisting our faculty in initiating and maintaining research protocols and publishing the results of their research projects. The nature of our research is both basic and clinical and is conducted in collaboration with other investigators and clinicians at the University of Utah, at several local private hospitals and medical offices, and in cooperation with other academic Departments in the country.

The University of Utah’s Health Care ranks among the nation's top academic medical centers, having received the University Health System Consortium's (UHC) Quality Leadership Award for five consecutive years. The Division of Reproductive Endocrinology and Infertility has had continuous NIH/NCI/NICHD funding since 1992, an ABOG approved fellowship since 2003 and significant interdisciplinary research and clinical collaborations. The Division has a full service clinical operation including an IVF program with clinical pregnancy rates that are substantially above national averages. Our infertility program has recently been accepted onto the United Healthcare/Optum Centers for Excellence for Infertility based on our proven track record of successful clinical outcomes, the fact that we provide comprehensive services, our physician credentials and our continuous quality assurance programs.
The Utah Center for Reproductive Medicine currently consists of five reproductive endocrinologists, a reproductive urologist, two PhDs, an experienced staff, fellows and trainees and a full service high-complexity assisted reproductive technology laboratory that services an international referral base. Our facilities in Salt Lake City, Utah include embryology, andrology, and endocrinology laboratories, two procedure suites, six ultrasound suites, the EPIC electronic medical record, and six satellite facilities along the Wasatch Front. We currently perform about 600 IVF cycles a year and attract most of our patients from Utah, Nevada, Idaho, and Wyoming. The Division Director will be a key leader in the development of a new “patient centered” care initiative, known as an Integrated Practice Unit that will encompass all aspects of fertility care within the institution and span all points of patient contact.

The University of Utah is an Equal Opportunity/Affirmative Action employer and educator. Minorities, women, and persons with disabilities are strongly encouraged to apply. Veterans preference. Reasonable accommodations provided.
