MARINE SAFETY INFORMATION BULLETIN (MSIB) 094-16
DECEMBER 20, 2016

PRECAUTION AREA
ST. JOHNS RIVER, JACKSONVILLE FLORIDA

Superior Construction will be conducting demolition and construction operations on the wharf structures located approximately 1,500 feet east of the Main Street Bridge on the north side of the St. Johns River, near downtown Jacksonville’s old shipyards. The Captain of the Port Jacksonville requests all mariners transiting the river east of the Main Street Bridge and adjacent to the north bank docks of the old shipyards, to proceed with caution and transit at a minimum safe speed to reduce wake.

The work is scheduled to commence on or around January 6, 2017 and will continue over the course of several months. The demolition and construction work will normally take place on weekdays during daylight hours. The operations will involve several commercial vessels, including the use of crane and material barges to remove concrete debris and drive piles. There will be a continuous transit of loaded barges from the work site to the north bank shipyard docks near the mouth of Hogan Creek. Additionally, work vessels will be moored along the project site at night.

For additional information regarding this MSIB, please contact MST1 Fosdick at (904) 714-7623.
