Gift-in-Kind Letter from **FANUC** AMERICA CORPORATION

The FANUC America MH Certified Education Training (CERT) Program certifies instructors at educational institutions to train their students to program FANUC robots. To accompany the MH CERT Program, new school locations receive (1) CERT Instructor Training and Tool Kit and (1) CERT School Comprehensive Educational Package at no cost.

The CERT Instructor Training and Tool Kit provides your designated instructor training materials and includes the following deliverables:

- (1) online seat to take CERT Cart Safety Features web course
- (1) online seat to take Robot Operations web course
- (1) online seat to take HandlingTool Operations and Programming web course
- (1) online seat to take HandlingPRO web course
- (1) seat to take a live HandlingTool Operation and Programming class at a FANUC facility
- (1) ROBOGUIDE Simulation Software license
- (1) FANUC Robot Operations Manual
- (1) FANUC HandlingTool Operations and Programming Manual
- (1) FANUC HandlingPRO (ROBOGUIDE Simulation) Manual

The industry value of the CERT Instructor Training and Tool Kit is \$15,500.

The CERT School Comprehensive Educational Package provides students training tools and ensures your instructor has the necessary tools to effectively teach their students. This package includes the following deliverables:

- (25) online seat to take Robot Operations web course
- (25) online seat to take HandlingTool Operations and Programming web course
- (25) online seat to take HandlingPRO web course
- (25) ROBOGUIDE Simulation Software license

The industry value of the CERT School Comprehensive Educational Package is \$290,840.

To become a certified CERT instructor, your designated instructor must:

1. Successfully complete the CERT Cart Safety Features web course
2. Successfully complete the Robot Operations web course
3. Successfully complete the HandlingTool Operations and Programming web course
4. Successfully complete the HandlingPRO web course
5. Attend the live HandlingTool Operation and Programming class at a FANUC facility
6. Pass the online Certified Education Robot Training Test
7. Provide an outline of their robotic syllabus/curriculum
8. Provide a video of a module/chapter being presented to an audience or faculty staff
