Release Notes for WIDA MODEL Online Version 1.1.8 General Data Protection Regulation (GDPR) Update

New Features

Test Administrator Interface (TAI)

- Login Wizard. New administrators will review their account information. All administrators (new and existing) will review and acknowledge a GDPR-updated privacy notice.

- Secure Messaging System. The MODEL Message Center is now available at **Support>Message Center** on the main menu. It replaces email for MODEL Support communication. (Shortcut: click on the email icon next to your name in the upper right hand corner of the MODEL homepage to jump to the Message Center.)

    o Send and receive MODEL Support messages here, similar to email.

    o MODEL administrator/users will receive a notification in their regular email when a message is waiting for them in the Message Center.

    o Go to **Training>Training Materials** on the main menu, and see *User's Guide to the Test Administrator Interface* for more details.

- New pages added under **Account** on the main menu.

    o **Account>My Profile**: User re-authentication is required to access this page. Administrators can view and edit their first and last name, MODEL username, password, and email; and download a file of their personal information.

    o **Account>Privacy Notice**: The current version of the MODEL Administrator Privacy Notice is posted here for viewing and reference.

    o **Account>Order History**: Test administration license purchase history for an account is displayed here, along with the expiration date for batches of licenses.

- Security timeout. To enhance the security of the personal information of administrators, user re-authentication is required to access the **Account> My Profile** and **Account>Administrator Management** pages. After 5 minutes of inactivity, the administrator is directed back to the user re-authentication page.

Enhancements

Administrator Login Screen

- Requesting a password reset and contacting MODEL Support are now easier! Click on the Forgot Username or Password? link or the Contact Us link on the administrator (MODEL TAI) login screen. These links replace the previous Help button.

Account

- **Administrator Management** page: Changed the functionality of this page to enhance security of administrators' personal information.

    - User re-authentication is now required to access this page.
    - Administrators can no longer edit their own or another administrator's personal information on this page. Administrators can only edit *their own* personal information, on the **My Profile** page.
    - Administrators can now edit the user role of another administrator at their own level or lower.
    - Unchanged:
        - Add new administrators to an account here.
        - Click the View/Edit (new) link by an administrator's name to access the following unchanged features:
            - Delete an administrator
            - Add or delete locations that an administrator is assigned to
            - Send an administrator a password reset email
          And the following new feature
            - Edit the role of another administrator
    - Unchanged: Test Administrators still do not have access to this page and do not see it on the TAI menu.

General Usability

- Various bug fixes and other performance enhancements.
