

Food Recovery = Food Rescue

Innovative Strategies

Free Webinar

Join us on November 16, 2016
1:00-2:30 pm (EST)

Description

The United States spends an estimated \$218 billion a year growing, processing, transporting, and disposing of food not eaten—52 million tons of food landfilled annually, plus another 10 million tons that is discarded or left unharvested on farms (ReFED). While in our country, 13 percent of households (15.8 million households) were food insecure in 2015 (Feeding America).

To register for the webinar:

After registering you will receive a confirmation email containing information about joining the webinar.

The Food Recovery Hierarchy prioritizes actions communities, organizations, businesses, and individuals can take to prevent and divert wasted food. Feed Hungry People is the second tier of [EPA's Food Recovery Hierarchy](#). Wasted food prevention and recovery can save resources, conserve water, and reduce greenhouse gas emissions, and help relieve hunger.

The webinar will present an overview of models for collecting and redistributing usable, healthy food to our neighbors in need. Two such models will be discussed in detail:

- The [Food Rescue Alliance](#), a project of **Boulder Food Rescue**, facilitates grass roots food recovery and movement-building around ending food waste and engaging in food justice in the Rocky Mountain region and around the country. The project entails a peer-learning network between food recovery organizations to share information, technology, and resources to develop innovative models of food recovery.
- The **Friendship Donations Network (FDN)** in Ithaca, New York. FDN rescues fresh, nutritious food that would otherwise be thrown away from stores and farms and redistributes it to neighbors in need. FDN's [Neighborhood Food Hubs](#) program received 8,268 pounds of fresh produce donated by household volunteers in 2015. Through the "hubs," residents can donate excess produce from gardens, orchards, or CSAs (community supported agriculture).

Presenters and Topics

Food Rescue Alliance

Hana Dansky, Executive Director
[Boulder Food Rescue](#)

Neighborhood Food Hubs

Meaghan Sheehan Rosen, Coordinator
[Friendship Donations Network](#)

An overview: Innovative Food Rescue Models

Athena Lee Bradley, Projects Manager
