

Melissa Calhoun – Halliburton, Senior Director - Talent Management

Melissa Calhoun is currently senior director of talent management at Halliburton. In this capacity, she is responsible for the employee development cycle overseeing corporate HR functions including talent selection, technical and non-technical competency, learning and training governance, career and performance management, succession and leadership development, and organizational effectiveness. Her experience spans 20 years in the oil and gas industry in a variety of technical and managerial positions at the district, regional and global level starting as a field engineer in the Gulf of Mexico and progressing through roles in operations, business development, engineering management and new product development. Melissa earned a bachelor's degree in chemical engineering from the Pennsylvania State University and has completed all of Halliburton's business and leadership development programs in partnership with The Mays Business School Center for Executive Development at Texas A&M University. She currently serves on advisory boards for PESA, Texas A&M's Engineering Global Programs and College of Human Resources Management, and Halliburton Foundation, Inc.'s University Advisory Board. Melissa has been married for 17 years and is the proud mother of 3.
