**HYGIENIST Appreciation Day**

As a courtesy to CDHA members the WSP is inviting the first 40 Hygienists who sign up a **FREE** day of high-quality CE. Please fax or email the forms back to us to reserve your space. Or you may go online to www.wsperio.org and register there. Please use the following code when registering: **CDHAFree**

There will be 5 CDE units for Hygienists. **HAD** will include three speakers for education, reception and exhibits.

**August 19, 2017**

Business Expo Center
1960 S. Anaheim Way, Anaheim, CA 92805

We only ask the following, since this is a limited attendance event, be sure you are going to attend when you register.

**RSVP by August 11, 2017**

**HOW TO REGISTER:**

**HYGIENISTS:** You must fill out the form on the reverse and fax or mail it to our offices. Or you can call Deb at 877-864-0263 and leave all of this information in your voice message.

Due to this being an invitation only event you cannot register online.

**DENTISTS:** You can fill out the form on the reverse and fax or mail it to our offices, you can call Deb at 877-864-0263 or you can register at www.wsperio.org.

*Only those specifically receiving this invitation are invited at no charge.*
DIAGNOSIS OF PERIODONTAL PROBLEMS
GERALD DRURY, M.S., D.D.S.

Course Description
This course will look at the clinical and radiographic parameters required to make a diagnosis of different periodontal diseases. Each parameter will be evaluated and discussed with a perspective as to its clinical importance. Dr. Drury will call upon his 40 plus years of clinical practice and teaching of current periodontal literature; and sixteen years as editor of “Periodontal Abstracts” to help with the discussion. The attendees will be provided a strong review of periodontal diagnosis, looking at all the different elements in gathering diagnostic information to best serve their patients.

The learning objectives include:
• Learn to identify clinical and radiographic parameters required for periodontal diagnosis.
• Understand those parameters and their relevance to clinical practice.
• The importance of considering all signs and symptoms in periodontal diagnosis.

Gerald Drury, M.S., D.D.S., is a past chairman of the American Board of Periodontology, editor of the Journal of the WSP, clinical professor and course director of Advanced Periodontology at USC. He is a past-president of the California Society of Periodontists and the WSP. Dr. Drury practices in Hermosa Beach, California.

PROGNOSIS FOR THE PERIODONTALLY COMPROMISED TOOTH
THOMAS J. KEPIC, D.D.S., M.S.D.

Course Description
A Historical Perspective Along With Short and Long-Term Follow up of Cases. Establishing an accurate periodontal prognosis is paramount to case success. Prognosis is often thought of as being “static,” established once, and never to change. However, proper periodontal therapy can alter a tooth’s prognosis, if done in time. This course will show both short and long-term cases where prognosis has changed during therapy.

The learning objectives include:
• Identifying the clinical factors used in assigning prognosis.
• Understanding the historical research that leads to the modern day concept of prognosis.
• Defining the new concept of periodontal diseases and host susceptibility as factors used in determining prognosis.

Thomas J. Kepic, D.D.S., M.S.D. is a Diplomate of the American Board of Periodontology and is a former Director for the American Board of Periodontology. Dr. Kepic was president for the California Society of Periodontists in 2011 and is past-president of the WSP. He is a guest lecturer at several universities in the U.S. and abroad and has published in peer-reviewed journals. Dr. Kepic practices in Upland, California.

IMPROVE YOUR QUALITY OF HYGIENE CARE
JODI DEMING, RDH

Course Description
Learn how to do what you have thought was impossible. Gain time in your hygiene appointment without compromising but even improving your quality of care.
• Utilization of air polishing and piezoelectric scaling equipment
• Application of supra and subgingival air polishing techniques
• Characteristics and application for various air polishing powders
• Implementation of air polishing therapy into your treatment protocol

Course Objectives:
• Understand biofilm and it's management.
• Understanding the new disease model.
• Polymicrobial Symbiotic and Dysbiosis- Beyond the red complex.
• Connect the role of air polishing and piezoelectric scaling to successful biofilm management
• Differentiate between supragingival and subgingival removal technology
• Provide greater comfort to patients during clinical procedures
• Identify steps to integrate air flow debridement into clinical protocols

Jodi has worked 28 years mastering non-surgical periodontal therapy techniques and procedures. She currently works in both periodontic and prosthodontic practices.

Jodi is a national and international educator, clinician, and lecturer. She has presented over a 150 lectures and workshops on advanced integration of ultrasonic and hand instrumentation. Jodi has served as adjunct faculty at the University of Southern California, School of Dentistry, Department of Dental Hygiene and at Spear Education. She is a Friends of Hu-Friedy Thought Leader valued for her involvement with biofilm research, instrument development and training. She is nationally recognized as an expert in endoscope and ultrasonic instrumentation.
