**You're invited!** Join one or all of our 2017 summer showcase events in Santa Clara, Santa Cruz & Monterey Counties to see Summer Learning Programs in action! These events are open to all, and we especially encourage school board members, district superintendents, staff, city/county agencies, elected officials, and parent leaders to attend. Come see successful practices in action, and share your perspectives on how a blend of academics and enrichment helps mitigate summer learning loss.

Summer Learning Programs show results!

- **84% of students report improved ability and motivation in school**
- **94% of students believe they can get better at something by trying harder**
- **93% of teachers report better relationships with students**
- **83% of students say the program helps them like school**
