

## Long Island Session Guide

### **eSD GURU Power Users Group (Pre-Conference Session)**

Join us for a deep dive into the robust capabilities of eSD GURU. In this pre-conference session, attendees will gain first-hand experience working with the collection of integration tools within this application, and leave with a better understanding of the technology and methodology we have employed to sync student data across district applications. This session is intended for technology directors, administrators, and other staff members who are responsible for managing district data.

### **eSD Mobile (Opening Session)**

In our opening session, we'll unveil the eSD Mobile native application. You'll learn how mobile push notifications have been integrated with existing eSD communications and messaging features to deliver critical information to parents' fingertips. We'll review the account provisioning process and our pilot offering so that you can kick the tires on the new application in advance of our formal release.

### **Online Registration**

Learn how the eSD Online Registration module replaced a third party product and saved the Cumberland Valley School District money. In this session, the eSD team will review the capabilities of this new offering. Andrew Thumma, who helped lead the implementation of this module at Cumberland Valley, will discuss the roll out from the district's perspective, including considerations and best practices when introducing a paperless registration solution to your community.

### **eSD GURU Third Party Integration**

In this session, we will cover the terminology and concepts commonly used when discussing third party integrations, and the practical application of each as it relates to eSD GURU. In addition, attendees will learn how they can use each of these tools to share roster data with instructional applications, enable single-sign on capabilities with eSD partners, and import a variety of student data from best-of-breed solutions, including bus assignments, meal statuses, and more.

### **Managing Emergency Contacts via the Parent Portal**

Back by popular demand. Just imagine how much time your district would save if they didn't have to mail (and reconcile) demographic verification forms! In this session, we'll review the online verification feature and deployment options, as well as newly added features.

### **Teacher Connect Management Tools**

Rolling out Teacher Connect has never been easier. In this session we'll review newly released deployment tools which allow building administrators to control Gradebook templates, display options, Gradebook reports, and more.

### **eSD Custom Transcript Builder**

In this session, we'll show you how to design gorgeous, custom transcripts which can be printed in-house and/or published directly to the portal.

### **eSD Notifications**

The Communications and TC Messaging modules have been integrated to provide districts with the ability to send notifications to parents and students using a variety of delivery methods. In this session, we'll show you how to send emails en masse and/or notifications to mobile devices based district-defined rules surrounding student attendance, grade reports, schedules, and more. We'll also show you how to create custom templates to control the text for each notification type.

### **Master Scheduling Refresher**

It's that time of year again! In this session, we'll provide tips and tricks to help you leverage all the tools available within eSD to manage master schedule building, scheduling, and study hall assignment processes.

### **NY State Reporting**

So many changes, so little time! In this session, we'll show you how to use eSD to meet new reporting requirements. We'll focus on those areas which require special attention from a setup standpoint, including teacher of record, teacher of record special ed, dual enrolled for college credit, CTE attendance reporting, and more.

### **Build a GURUBoard**

In this session, we'll demonstrate how you can easily build boards for your administrators, counselors, teachers, and other staff members. Bring your own device!

### **eSD Online Course Offerings**

Turn off the lights and grab some popcorn. We'll run through eSD Online Course offerings that have been specifically designed to help you meet your district's CTLE needs.

### **eSD Focus Forum**

In these sessions, we'll review features and gather end-user feedback on a variety of modules, including Health, Attendance, and Data Tables.
