

# RECLAMATION

*Managing Water in the West*

Funding Opportunity Announcement No. BOR-DO-17-F011

## WaterSMART Grants: Small-Scale Water Efficiency Projects for Fiscal Year 2017

U.S. Department of the Interior  
Bureau of Reclamation  
Policy and Administration  
Denver, Colorado

November 2016

## **Mission Statements**

The U.S. Department of the Interior protects America's natural resources and heritage, honors our cultures and tribal communities, and supplies the energy to power our future.

The mission of the Bureau of Reclamation is to manage, develop, and protect water and related resources in an environmentally and economically sound manner in the interest of the American public.

Photo: Huntington Cleveland Canal, Emery County Project, Upper Colorado Region

# Synopsis

<b>Federal Agency Name:</b>	Department of the Interior, Bureau of Reclamation, Policy and Administration
<b>Funding Opportunity Title:</b>	WaterSMART Grants: Small-Scale Water Efficiency Projects for Fiscal Year 2017
<b>Announcement Type:</b>	Funding Opportunity Announcement (FOA)
<b>Funding Opportunity Number:</b>	BOR-DO-17-F011
<b>Catalog of Federal Domestic Assistance (CFDA) Number:</b>	15.507
<b>Dates:</b> (See FOA Sec. D.4 and E.3.)	<p>Proposals will be accepted, evaluated, and selected on a rolling-basis until the final application submission deadline: April 27, 2017 at 4:00 p.m. Mountain Daylight Time (MDT)</p> <p>Tentative selection and announcement timeframe: March 2017: for proposals submitted before January 13, 2017 June 2017: for proposals submitted after January 13, 2017</p>
<b>Eligible Applicants:</b> (See FOA Sec. C.1)	States, Indian tribes, irrigation districts, water districts, or other organizations with water or power delivery authority located in the Western United States or United States Territories as identified in the Reclamation Act of June 17, 1902, as amended
<b>Recipient Cost Share:</b> (See FOA Sec. C.2)	50 percent or more of total project costs. Total project costs shall not exceed \$150,000.
<b>Federal Funding Amount:</b> (See FOA Sec. B.2)	Up to \$75,000 per applicant
<b>Estimated Number of Agreements to be Awarded:</b> (See FOA Sec. B.1)	Approximately 25 - 30 projects
<b>Estimated Amount of Funding Available for Award:</b> (See FOA Sec B.1)	<p>Of the President's fiscal year (FY) 2017 budget for WaterSMART Grants, approximately \$2 million will be made available for this FOA. Reclamation will determine the amount of funding available for award under this FOA once final FY 2017 appropriations have been made. The amount of funding available for awards may also vary depending on the demand for this and other WaterSMART Grants funding opportunities. Any awards are subject to a determination by Reclamation that FY 2017 appropriations are available and that awards can be made consistent with all program requirements.</p> <p>Applications submitted under this FOA may also be considered if additional funding becomes available in FY 2017 or thereafter.</p>

This page is intentionally left blank.

# Application Checklist

The following table contains a summary of the information that you are required to submit with your application.

✓	What to submit	Required content	Form or format	When to submit
	Mandatory Federal Forms: Application for Federal Financial Assistance Budget Information Assurances	See Sec. D.2.2.1	SF-424, SF-424A, SF-424B, SF-424C, and SF-424D forms may be obtained at <a href="http://www.grants.gov/web/grants/forms/sf-424-family.html">http://www.grants.gov/web/grants/forms/sf-424-family.html</a>	*
	Title page	See Sec. D.2.2.2	Page 12	*
	Table of contents	See Sec. D.2.2.3	Page 13	*
	Technical proposal:			*
	Executive summary	See Sec. D.2.2.4	Page 13	*
	Background data	See Sec. D.2.2.4	Page 13	*
	Project description	See Sec. D.2.2.4	Page 14	*
	Evaluation criteria	See Sec. E.1	Pages 29 to 31	*
	Environmental and cultural resources compliance	See Sec. D.2.2.5	Page 14	*
	Required permits or approvals	See Sec. D.2.2.6	Page 16	*
	Official Resolutions	See Sec. D.2.2.7	Page 16	**
	Project Budget:	See Sec. D.2.2.8	Pages 17 to 23	*
	Funding plan and letters of commitment	See Sec. D.2.2.8	Page 17	*
	Budget proposal	See Sec. D.2.2.8	Page 19	*
	Budget narrative	See Sec. D.2.2.8	Page 20	*
	Unique Entity Identifier and System for Award Management	See Sec. D.3	Page 23	***

\* Submit materials with your application prior to April 27, 2017 at 4:00 p.m. Mountain Daylight Time (MDT)

\*\* Document should be submitted with your application; however, please refer to the applicable section of the FOA for extended submission date.

\*\*\* Should be completed by application deadline; however, please refer to the applicable section of the FOA for extended completion date.

This page is intentionally left blank.

## Acronyms and Abbreviations

ASAP	Automated Standard Application for Payments
ARC	Application Review Committee
CE	Categorical Exclusion
CEC	Categorical Exclusion Checklist
CFDA	Catalog of Federal Domestic Assistance

## Section A. Funding Opportunity Description

### A.1. Program Information

The Nation faces an increasing set of water resource challenges. Aging infrastructure, rapid population growth, depletion of groundwater resources, impaired water quality associated with particular land uses and land covers, water needed for human and environmental uses, and climate variability and change all play a role in determining the amount of fresh water available at any given place and time. Water shortages and water-use conflicts have become more commonplace in many areas of the United States (U.S.), even in normal water years. As competition for water resources grows—for crop irrigation, growing cities and communities, energy production, and the environment—the need for information and tools to aid water resource managers also grows. Water issues and challenges are increasing across the Nation, but particularly in the West, due to prolonged drought.

These water issues are exacerbating the challenges facing traditional water management approaches which by themselves no longer meet today's needs. The U.S. Department of the Interior's (Interior) WaterSMART (Sustain and Manage America's Resources for Tomorrow) Program establishes a framework to provide Federal leadership and assistance for using water efficiently, integrating water and energy policies to support the sustainable use of all natural resources, and coordinating the water conservation activities of various Interior bureaus and offices. Through the program, Interior is working to achieve a sustainable water strategy to meet the Nation's water needs.

Through WaterSMART Grants, the Bureau of Reclamation (Reclamation) provides financial assistance to water managers for projects that seek to conserve and use water more efficiently, increase the use of renewable energy and improve energy efficiency, benefit threatened and endangered species, investigate and develop water marketing strategies, prevent any water related-related crisis, or otherwise contribute to water supply sustainability in the Western United States.

**This Funding Opportunity Announcement (FOA) supports specific small-scale water efficiency projects that have been prioritized through planning efforts led by the applicant.**

Over the last five years, available WaterSMART Grants funding has been focused on one category: Water and Energy Efficiency Grants. Reclamation is making three separate WaterSMART Grants funding opportunities available for 2017, including two new funding categories: Small-Scale Water Efficiency Projects and Water Marketing Grants. These new FOAs are intended to complement the Water and Energy Efficiency Grant projects carried out each year.

- **Water and Energy Efficiency Grants** focus on projects that result in quantifiable and sustained water savings, including canal lining and piping projects, irrigation flow measurement, canal automation, installation of residential and commercial water meters, and other similar projects. This grant category also supports projects that increase renewable energy use and improve energy efficiency, as well as

## Funding Opportunity Announcement No. BOR-DO-17-F011

projects that address endangered species issues and otherwise support broader water sustainability benefits.

- **Small-Scale Water Efficiency Projects** (i.e., this FOA) support small-scale water management projects (up to \$75,000 in Federal funding for each project) that have been identified through previous planning efforts. Reclamation has developed a streamlined selection and review process to reflect the small-scale nature of these projects.
- **Water Marketing Grants** provide meaningful support for entities exploring actions that can be taken to develop or facilitate water marketing. Under this funding opportunity, which is expected to be available in February 2017, applicants will be invited to conduct planning activities to develop a water marketing strategy to establish or expand water markets or water marketing transactions.

Larger projects or those with multiple project components or renewable energy components should be submitted under WaterSMART Water and Energy Efficiency Grants.

For further information on WaterSMART Grants, please see [www.usbr.gov/watersmart/grants.html](http://www.usbr.gov/watersmart/grants.html).

For further information on the WaterSMART Program, please see [www.usbr.gov/WaterSMART](http://www.usbr.gov/WaterSMART).

## A.2. Objective of this Funding Opportunity Announcement

The objective of this FOA is to invite states, Indian tribes, irrigation districts, water districts, and other organizations with water or power delivery authority to leverage their money and resources by cost sharing with Reclamation on small-scale on-the-ground projects that seek to conserve, better manage, or otherwise make more efficient use of water supplies.

Proposed projects that are supported by an existing water management and conservation plan, System Optimization Review, or other planning effort led by the applicant are prioritized. This prioritization will help ensure that projects funded under this FOA are well thought out, have public support, and have been identified as the best way to address water management concerns.

### ***Streamlined Application and Selection Process***

Reclamation is making an effort to simplify the criteria and streamline the application process for this new category of WaterSMART Grants to ensure the process works for smaller entities. This FOA also allows for a rolling application submission to provide an opportunity for smaller entities to develop and submit applications for funding as their schedules permit. Simplified evaluation criteria are intended to provide each applicant with an opportunity to succinctly explain how the proposed project would meet a defined need identified through a prior planning effort. Reclamation has also clarified the budget

## **Section A. Funding Opportunity Description**

documentation necessary under this FOA in recognition of the small-scale nature of the projects being funded.

### **A.3. Statutory Authority**

This FOA is issued under the authority of Section 9504(a) of the Secure Water Act, Subtitle F of Title IX of the Omnibus Public Land Management Act of 2009, Public Law (P.L.) 111-11 (42 United States Code (USC) 10364).

### **A.4. Other Related Funding Opportunities**

A separate FOA for WaterSMART Water and Energy Efficiency Grants (BOR-DO-17-F012) will be posted on Grants.gov ([www.grants.gov](http://www.grants.gov)) concurrently with this FOA. The Water and Energy Efficiency Grants FOA includes financial assistance on a 50/50 cost share basis for larger water conservation projects and those with multiple project components or renewable energy components.

This page is intentionally left blank.

## Section B. Award Information

### B.1. Total Project Funding

Of the President's fiscal year (FY) 2017 budget WaterSMART Grants, Reclamation will make approximately \$2 million available for the implementation of Small-Scale Water Efficiency Projects under this FOA. The amount of funding available for awards depends on final FY 2017 appropriations. This FOA will be canceled if FY 2017 appropriations are insufficient to support new awards. The total amount of funding for awards under this FOA will depend on the demand for funding under this and other categories of WaterSMART Grants.

Applications submitted under this FOA may also be considered if additional funding becomes available in FY 2017 or thereafter. Please refer to Reclamation's WaterSMART Grants website ([www.usbr.gov/watersmart/grants.html](http://www.usbr.gov/watersmart/grants.html)) for updated funding information.

### B.2. Project Funding Limitations

Multiple applications for funding may be submitted for consideration. No more than one award will be made to each applicant during the rolling submission and selection process. If sufficient funding is available at the end of the application period, Reclamation may consider award of additional applications.

The Federal share (Reclamation's share in addition to any other sources of Federal funding) of any one proposed project shall not exceed 50 percent of the total project costs. Generally, the non-Federal share of project costs must be expended at the same or greater rate as the Federal share of project costs.

Up to \$75,000 in Federal funds per proposal will be available through this FOA to implement small-scale on-the-ground efficiency projects. The total project costs of each proposal submitted for funding under this FOA is limited to \$150,000.

**Proposals that include project costs totaling more than \$150,000 should be submitted under the WaterSMART Grants: Water and Energy Efficiency Grants FOA (BOR-DO-17-F012). Reclamation will not award funding under both this FOA and this year's Water and Energy Efficiency Grants FOA for the same activity.**

### B.3. Assistance Instrument

Project awards will be made through grants or cooperative agreements as applicable to each project. If a cooperative agreement is awarded, the recipient should expect Reclamation to have substantial involvement in the project.

## **Funding Opportunity Announcement No. BOR-DO-17-F011**

Substantial involvement by Reclamation may include:

- Collaboration and participation with the recipient in the management of the project and close oversight of the recipient's activities to ensure that the program objectives are being achieved.
- Oversight may include review, input, and approval at key interim stages of the project.

At the request of the recipient, Reclamation can provide technical assistance after award. If you would like to receive Reclamation technical assistance, you must account for these costs in your budget. To discuss available assistance and these costs, contact your local Reclamation office, listed at [www.usbr.gov/main/offices.html](http://www.usbr.gov/main/offices.html).

## Section C. Eligibility Information

### C.1. Eligible Applicants

Under P.L. 111-11, Section 9502, an eligible applicant is a state, tribe, irrigation district, water district, or other organization with water or power delivery authority.

Applicants must also be located in the Western United States or Territories as identified in the Reclamation Act of June 17, 1902, as amended and supplemented; specifically: Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, Wyoming, American Samoa, Guam, the Northern Mariana Islands, and the Virgin Islands.

**Those not eligible** include, but are not limited to, the following entities:

- Federal governmental entities
- Institutions of higher education
- Individuals

### C.2. Cost Sharing Requirements

Applicants must be capable of cost sharing 50 percent or more of the total project costs. The total project costs of each proposal submitted for funding under this FOA is limited to \$150,000. Cost sharing may be made through cash or in-kind contributions from the applicant or third-party partners. Cost-share funding from sources outside the applicant's organization (e.g., loans or state grants) should be secured and available to the applicant prior to award. Please see *Section D.2.2.7 Official Resolution* and *D.2.2.8 Funding Plan and Letters of Commitment* for more information regarding the documentation required to verify commitments to meet cost sharing requirements.

#### C.2.1. Cost Share Regulations

All cost-share contributions must meet the applicable administrative and cost principles criteria established in 2 Code of Federal Regulations (CFR) Part 200, available at [www.ecfr.gov](http://www.ecfr.gov).

#### C.2.2. In-Kind Contributions

In-kind contributions constitute the value of noncash contributions that benefit a federally assisted project. These contributions may be in the form of real property, equipment, supplies, and other expendable property, as well as the value of goods and services directly benefiting and specifically identifiable to the project or program. The cost or value of in-kind contributions that have been or will be relied on to satisfy a cost sharing or matching requirement for another Federal financial assistance agreement, a Federal procurement contract, or any other award of Federal funds may not be relied on to satisfy the cost share requirement for an award under this FOA; except where the Federal statute authorizing a program specifically provides that Federal funds made available for such program can be applied to matching or cost sharing requirements of other Federal

## **Funding Opportunity Announcement No. BOR-DO-17-F011**

programs, such as awards to tribal organizations under P.L. 93-638, as amended. Applicants should refer to 2 CFR §200.434 for regulations regarding the valuation of in-kind donations and contributions, available at [www.ecfr.gov](http://www.ecfr.gov).

### **C.3. Eligible Projects**

#### ***C.3.1. Eligible Projects***

Reclamation will provide funding for small-scale on-the-ground efficiency projects which seek to implement work identified in an applicant's water planning efforts.

Example projects include, but are not limited to:

- Canal Lining/Piping.
- Municipal Metering.
- Irrigation Flow Measurement.
- Supervisory Control and Data Acquisition (SCADA) and Automation.
- Landscape Irrigation Measures.
- High-Efficiency Indoor Appliances and Fixtures.

Other projects that are similar to those tasks listed above may be submitted for consideration and will be allowed to the extent that they are consistent with program authorization and goals.

#### ***C.3.2. Ineligible Projects***

Projects that are not eligible for funding under this FOA include, but are not limited to:

- Projects considered normal operations, maintenance, and replacement (OM&R)
- Projects that are part of a congressionally authorized Title XVI project under P.L.102-575, as amended (43 USC 390h et seq.). A list of congressionally authorized Title XVI projects can be found at [www.usbr.gov/watersmart/title/authorized.html](http://www.usbr.gov/watersmart/title/authorized.html).
- Water purchases
- Construction of buildings for administration purposes
- Pilot projects

The subsections below have more explanation regarding these types of ineligible projects.

##### **C.3.2.1. Operations, Maintenance, and Replacement**

In accordance with Section 9504 of the Secure Water Act, projects that are considered normal OM&R are not eligible for funding under this FOA. OM&R is described as system improvements that replace or repair existing infrastructure or function without providing

increased efficiency or effectiveness of water distribution over the expected life of the improvement. Examples of ineligible OM&R projects include:

- Replacing malfunctioning components of an existing facility with the same components
- Improving an existing facility to operate as originally designed
- Performing an activity on a recurring basis, even if that period is extended (e.g., 10-year interval)
- Sealing expansion joints of concrete lining because the original sealer or the water stops have failed
- Replacing broken meters with new meters of the same type
- Replacing leaky pipes with new pipes of the same type

Applicants that have questions regarding OM&R are encouraged to contact the Program Coordinator (see *Section G. Agency Contacts*) prior to the application deadline for further information.

### C.3.2.2. Title XVI Water Recycling and Reuse

Title XVI is Reclamation's Water Recycling and Reuse Program focused on identifying and investigating opportunities to reclaim and reuse wastewaters and naturally impaired ground and surface water. In general, this FOA is not intended for large scale water recycling and reuse projects. *Note, however, that small-scale improvements that relate to an existing water recycling facility (that is **not** an authorized Title XVI project) may be considered eligible for funding.*

Any projects or project elements that are part of a congressionally authorized Title XVI project of P.L.102-575, as amended (43 USC 390h et seq.), are not eligible for funding under this FOA. A list of congressionally authorized Title XVI projects can be found at <http://www.usbr.gov/watersmart/title/authorized.html>.

In addition, if a project sponsor is likely to seek funding for the activity through the Title XVI Program in the future (e.g., seeking congressional authorization for the project or preparing a Title XVI feasibility study that describes the activity as part of a proposed Title XVI project) that activity should be pursued under the Title XVI Program instead of this FOA.

If your project is in the same area as a congressionally authorized project, or if you are unclear whether your project is part of a congressionally authorized Title XVI project, please contact Amanda Erath at 303-445-2766.

For additional information on the Title XVI Program, please see [www.usbr.gov/WaterSMART/title](http://www.usbr.gov/WaterSMART/title).

**C.3.2.3. Water Purchases**

Proposals to use Federal funding to purchase water are not eligible under this FOA. Applicants seeking funding to purchase water in a drought emergency should request emergency drought assistance under Reclamation's Drought Response Program.

For more information about the requirements for receiving emergency drought assistance, please see [www.usbr.gov/drought](http://www.usbr.gov/drought).

**C.3.2.4. Building Construction**

Proposals to construct a building are not eligible for Federal funding under this FOA (e.g., a building to house administrative staff or to promote public awareness of water conservation).

**C.3.2.5. Pilot Projects**

Proposals to conduct a pilot study to evaluate technical capability, economic feasibility, or viability for full-scale implementation or to test an unproven material or technology are not eligible for Federal funding under this FOA.

**C.3.3. *Length of Projects***

In general, proposed projects should be completed within two years of award.

## Section D. Application and Submission Information

### D.1. Address to Request Application Package

This document contains all information, forms, and electronic addresses required to obtain the information required for submission of an application.

If you are unable to access this information electronically, you can request paper copies of any of the documents referenced in this FOA by contacting:

By mail: Bureau of Reclamation  
Financial Assistance Operations  
Attn: Mr. Darren Olson  
Mail Code: 84-27852  
P.O. Box 25007  
Denver, CO 80225

By e-mail: [dolson@usbr.gov](mailto:dolson@usbr.gov)

By telephone: 303-445-3697

### D.2. Content and Form of Application Submission

All applications must conform to the requirements set forth below.

#### *D.2.1. Application Format and Length*

The total application package shall be no more than **15** consecutively numbered pages. If an application exceeds **15** pages, only the first **15** pages will be evaluated. The font shall be at least 12 points in size and easily readable. Page size shall be 8½ by 11 inches, including charts, maps, and drawings. Oversized pages will not be accepted. The SF-424 forms will not be considered in the total page count.

Applications will be prescreened for compliance to the page number limitations.

#### *D.2.2. Application Content*

The application must include the following elements to be considered complete:

- Mandatory Federal Forms
  - SF-424 Application for Federal Assistance
  - SF-424 Budget Information (A or C Form, as applicable to the project)
  - SF-424 Assurances (B or D Form, as applicable to the project)

SF-424, SF-424A, SF-424B, SF-424C, and SF-424D forms may be obtained at [www.grants.gov/web/grants/forms/sf-424-family.html](http://www.grants.gov/web/grants/forms/sf-424-family.html)

- Title page
- Table of contents
- Technical proposal and evaluation criteria
  - Executive summary
  - Background data
  - Project description
  - Evaluation criteria
- Environmental and cultural resources compliance
- Required permits or approvals
- Official resolution (will not count toward the page limitation)
- Project budget
  - Funding plan and letters of commitment
  - Budget proposal
  - Budget narrative

#### **D.2.2.1. Mandatory Federal Forms**

The application must include the following standard Federal forms:

##### ***SF-424 Application for Federal Assistance***

A fully completed SF-424 Application for Federal Assistance signed by a person legally authorized to commit the applicant to performance of the project must be submitted with the application. Failure to submit a properly signed SF-424 may result in the elimination of the application from further consideration.

##### ***SF-424 Budget Form***

A fully completed SF-424A Budget Information Non-Construction Programs or SF-424C Budget Information Construction Programs must be submitted with the application. If you need to ask whether to use an SF-424A or SF-424C, please contact the Reclamation Financial Assistance Management contact identified in *Section G. Agency Contacts*.

##### ***SF-424 Assurances***

A SF-424B Assurances Non-Construction Programs, or a SF-424D Assurances Construction Programs, signed by a person legally authorized to commit the applicant to performance of the project must be included with the application. If

## Section D. Application and Submission Information

you need to ask whether to use a SF-424A or SF-424C, please contact the Reclamation Financial Assistance Management contact identified in *Section G. Agency Contacts*. Failure to submit a properly signed SF-424B or SF-424D may result in the elimination of the application from further consideration.

### D.2.2.2. Title Page

Provide a brief, informative, and descriptive title for the proposed work that indicates the nature of the project. Include the name and address of the applicant and the name and address, e-mail address, and telephone of the project manager.

### D.2.2.3. Table of Contents

List all major sections of the proposal in the table of contents.

### D.2.2.4. Technical Proposal and Evaluation Criteria

The technical proposal and evaluation criteria includes:

- (1) Executive summary
- (2) Background data
- (3) Project description
- (4) Evaluation criteria

### *Executive Summary*

The executive summary should include:

- The date, applicant name, city, county, and state
- A one paragraph project summary that specifies the work proposed, including how funds will be used to accomplish specific project activities and briefly identifies how the proposed project contributes to accomplishing the goals of this FOA (see *Section C.3.1. Eligible Projects*)
- The length of time and estimated completion date for the proposed project
- Whether or not the proposed project is located on a Federal facility

### *Background Data*

Provide a map of the area showing the geographic location (include the state, county, and direction from nearest town) of the proposed project.

As applicable, describe the source of water supply, the total quantity of water supply managed and supplied, the water rights involved, current water uses (i.e., agricultural, municipal, domestic, or industrial), the number of water users served, and the current and projected water demand. If water is primarily used for irrigation, describe major crops and total acres served. Also, identify potential shortfalls in water supply.

In addition, describe the applicant's water delivery or distribution system as appropriate. For agricultural systems, please include the types and approximate total lengths of canals and laterals (e.g., unlined or lined open channel, pipe, including types of pipe and lining materials), the number of irrigation turnouts and other significant existing irrigation improvements (e.g., automated control structures, remote monitoring devices and SCADA systems). For municipal systems, please include the total approximate length of distribution lines, number and sizes of storage tanks, number of pump stations and capacities, and the number of connections and/or number of water users served and any other relevant information describing the system.

Identify any past working relationships with Reclamation. This should include the date(s), description of the relationship(s) with Reclamation, and a description of the projects(s).

### ***Project Description***

The project description should describe the work in detail, including project milestones and specific activities that will be accomplished. This description shall have sufficient detail to permit a comprehensive evaluation of the proposal.

- Identify the problems and needs
- Describe how the project is intended to address the problems and needs
- Identify the expected outcomes

### ***Evaluation Criteria***

**(See *Section E.1. Evaluation Criteria* for additional details, including a detailed description of each criterion and subcriterion and points associated with each.)**

**The evaluation criteria portion of your application should address each criterion and subcriterion in the order presented to assist in the complete and accurate evaluation of your proposal.**

***It is suggested that applicants copy and paste the evaluation criteria and subcriteria in Section E.1. Evaluation Criteria into their applications to ensure that all necessary information is adequately addressed.***

### **D.2.2.5. Environmental and Cultural Resources Compliance**

To allow Reclamation to assess the probable environmental and cultural resources impacts and costs associated with each application, all applicants must respond to the following list of questions focusing on National Environmental Policy Act (NEPA), Endangered Species Act (ESA), and National Historic Preservation Act (NHPA) requirements. Please answer the following questions to the best of your knowledge. If any question is not applicable to the project, please explain why.

## Section D. Application and Submission Information

The application should include the answers to:

- Will the proposed project impact the surrounding environment (e.g., soil [dust], air, water [quality and quantity], animal habitat)? Please briefly describe all earth-disturbing work and any work that will affect the air, water, or animal habitat in the project area. Please also explain the impacts of such work on the surrounding environment and any steps that could be taken to minimize the impacts.
- Are you aware of any species listed or proposed to be listed as a Federal threatened or endangered species, or designated critical habitat in the project area? If so, would they be affected by any activities associated with the proposed project?
- Are there wetlands or other surface waters inside the project boundaries that potentially fall under Clean Water Act (CWA) jurisdiction as “Waters of the United States?” If so, please describe and estimate any impacts the proposed project may have.
- When was the water delivery system constructed?
- Will the proposed project result in any modification of or effects to, individual features of an irrigation system (e.g., headgates, canals, or flumes)? If so, state when those features were constructed and describe the nature and timing of any extensive alterations or modifications to those features completed previously.
- Are any buildings, structures, or features in the irrigation district listed or eligible for listing on the National Register of Historic Places? A cultural resources specialist at your local Reclamation office or the State Historic Preservation Office can assist in answering this question.
- Are there any known archeological sites in the proposed project area?
- Will the proposed project have a disproportionately high and adverse effect on low income or minority populations?
- Will the proposed project limit access to and ceremonial use of Indian sacred sites or result in other impacts on tribal lands?
- Will the proposed project contribute to the introduction, continued existence, or spread of noxious weeds or non-native invasive species known to occur in the area?

*Note, if mitigation is required to lessen environmental impacts, the applicant may, at Reclamation's discretion, be required to report on progress and completion of these commitments. Reclamation will coordinate with the applicant to establish reporting requirements and intervals accordingly.*

***Under no circumstances may an applicant begin any ground-disturbing activities (including grading, clearing, and other preliminary activities) on a project before environmental compliance is complete and Reclamation explicitly authorizes work to proceed. This pertains to all components of the proposed project, including those that are part of the applicant's non-Federal cost share. Reclamation will provide a successful applicant with information once environmental compliance is complete. An applicant that proceeds before environmental compliance is complete may risk forfeiting Reclamation funding under this FOA.***

If you have any questions regarding NEPA, ESA and NHPA requirements, please see *Section H. Other Information* and contact your local Reclamation office, listed at [www.usbr.gov/main/offices.html](http://www.usbr.gov/main/offices.html).

#### **D.2.2.6. Required Permits or Approvals**

Applicants must state in the application whether any permits or approvals are required and explain the plan for obtaining such permits or approvals.

Note that improvements to Federal facilities that are implemented through any project awarded funding through this FOA must comply with additional requirements. The Federal government will continue to hold title to the Federal facility and any improvement that is integral to the existing operations of that facility. Please see P.L. 111-11, Section 9504(a)(3)(B). Reclamation may also require additional reviews and approvals prior to award to ensure that any necessary easements, land use authorizations, or special permits can be approved consistent with the requirements of 43 CFR Section 429, and that the development will not impact or impair project operations or efficiency.

#### **D.2.2.7. Official Resolution**

Include an official resolution adopted by the applicant's board of directors or governing body, or, for state government entities, an official authorized to commit the applicant to the financial and legal obligations associated with receipt of a financial assistance award under this FOA, verifying:

- The identity of the official with legal authority to enter into an agreement
- The board of directors, governing body, or appropriate official who has reviewed and supports the application submitted
- The capability of the applicant to provide the amount of funding and/or in-kind contributions specified in the funding plan

## Section D. Application and Submission Information

- That the applicant will work with Reclamation to meet established deadlines for entering into a grant or cooperative agreement

### **An official resolution meeting the requirements set forth above is mandatory.**

If the applicant is unable to submit the official resolution by the application deadline because of the timing of board meetings or other justifiable reasons, the official resolution may be submitted up to 30 days after the application deadline.

#### **D.2.2.8. Project Budget**

The project budget includes:

- (1) Funding plan and letters of commitment
- (2) Budget proposal
- (3) Budget narrative

#### ***Funding Plan and Letters of Commitment***

Describe how the non-Federal share of project costs will be obtained. Reclamation will use this information in making a determination of financial capability.

Project funding provided by a source other than the applicant shall be supported with letters of commitment from these additional sources. This is a **mandatory requirement**. Letters of commitment shall identify the following elements:

- The amount of funding commitment
- The date the funds will be available to the applicant
- Any time constraints on the availability of funds
- Any other contingencies associated with the funding commitment

Commitment letters from third party funding sources should be submitted with your project application. If commitment letters are not available at the time of the application submission, please provide a timeline for submission of all commitment letters. Cost-share funding from sources outside the applicant's organization (e.g., loans or state grants), should be secured and available to the applicant prior to award.

Reclamation will not make funds available for an award under this FOA until the recipient has secured non-Federal cost share. Reclamation will execute a financial assistance agreement once non-Federal funding has been secured or Reclamation determines that there is sufficient evidence and likelihood that non-Federal funds will be available to the applicant subsequent to executing the agreement.

## Funding Opportunity Announcement No. BOR-DO-17-F011

The funding plan must include all project costs, as follows:

- How you will make your contribution to the cost-share requirement, such as monetary and/or in-kind contributions and source funds contributed by the applicant (e.g., reserve account, tax revenue, and/or assessments).
- Describe any costs incurred before the anticipated Project start date that you seek to include as project costs. For each cost, identify:
  - The Project expenditure and amount
  - Whether the expenditure is or will be in the form of in-kind services or donations
  - The date of cost incurrence
  - How the expenditure benefits the Project
- Describe any funding requested or received from other Federal partners.  
*Note: other sources of Federal funding may not be counted towards the cost share unless otherwise allowed by statute.*
- Describe any pending funding requests that have not yet been approved, and explain how the project will be affected if such funding is denied.

Please include the following chart (Table 1) to summarize all funding sources. Denote in-kind contributions with an asterisk (\*).

**Table 1.—Summary of Non-Federal and Federal Funding Sources**

FUNDING SOURCES	AMOUNT
<b>Non Federal Entities</b>	
1.	
2.	
3.	
<b>Non-Federal Subtotal</b>	
<b>Other Federal Entities</b>

<b>Other Federal Subtotal</b>	
<b>REQUESTED RECLAMATION FUNDING</b>	

## Section D. Application and Submission Information

### *Budget Proposal*

The budget proposal should include detailed information on the categories listed below and must clearly identify all project costs. Unit costs shall be provided for all budget items including the cost of work to be provided by contractors. The budget proposal should also include any in-kind contributions of goods and services that will be provided to complete the project. It is strongly advised that applicants use the budget proposal format shown below on Table 2 or a similar format that provides this information. If selected for award, successful applicants must submit detailed supporting documentation for all budgeted costs.

**Table 2.—Sample Budget Proposal Format**

BUDGET ITEM DESCRIPTION	COMPUTATION		Quantity Type	TOTAL COST
	\$/Unit	Quantity		
Salaries and Wages				
Employee 1				\$
Employee 2				\$
Employee 3				\$
Fringe Benefits				
Full-Time Employees				\$
Part-Time Employees				\$
Equipment				
Item A				\$
Item B				\$
Item C				\$
Supplies and Materials				
Item A				\$
Item B				\$
Contractual/Construction				
Contractor A				\$
Contractor B				\$
Other				
Other				\$
TOTAL DIRECT COSTS				\$
Indirect Costs				
Type of rate	percentage	\$base		\$
TOTAL ESTIMATED PROJECT COSTS				\$

### ***Budget Narrative***

Submission of a budget narrative is mandatory. An award will not be made to any applicant who fails to fully disclose this information. The budget narrative provides a discussion of, or explanation for, items included in the budget proposal. Include the value of in-kind contributions of goods and services and sources of funds provided to complete the project. The types of information to describe in the narrative include, but are not limited to, those listed in the following subsections. Costs, including the valuation of in-kind contributions and donations, must comply with the applicable cost principles contained in 2 CFR Part §200, available at the Electronic Code of Federal Regulations ([www.ecfr.gov](http://www.ecfr.gov)).

### ***Salaries and Wages***

Indicate the program manager and other key personnel by name and title. Other personnel may be indicated by title alone. For all positions, indicate salaries and wages, estimated hours or percent of time, and rate of compensation. The labor rates should identify the direct labor rate separate from the fringe rate or fringe cost for each category.

Include estimated hours for compliance with reporting requirements, including final project and evaluation. Please see *Section F.3. Reporting Requirements and Distribution* for information on types and frequency of reports required.

Generally, salaries of administrative and/or clerical personnel will be included as a portion of the stated indirect costs. If these salaries can be adequately documented as direct costs, they should be included in this section; however, a justification should be included in the budget narrative.

**Within the budget narrative, please provide a certification that the labor rates included in the budget proposal represent the actual labor rates of the identified personnel. If the proposal is selected for award and the awarding Grants Officer determines that the provided rates fall within Bureau of Labor Statistic averages for personnel with similar job descriptions, no further documentation for this item of cost shall be requested during budget negotiations.**

### ***Fringe Benefits***

Indicate rates/amounts, what costs are included in this category, and the basis of the rate computations. Indicate whether these rates are used for application purposes only or whether they are fixed or provisional rates for billing purposes. Federally approved rate agreements are acceptable for compliance with this item.

## Section D. Application and Submission Information

### *Travel*

Travel related expenses are not eligible for reimbursement under this FOA and should not be included within the proposed budget.

### *Equipment*

If equipment will be purchased, itemize all equipment valued at or greater than \$5,000. For each item, identify why it is needed for the completion of the project and how the equipment was priced. *Note: if the value is less than \$5,000, the item should be included under materials and supplies.*

If equipment is being rented, specify the number of hours and the hourly rate. Local rental rates are only accepted for equipment actually being rented or leased for the project.

If the applicant intends to use their own equipment for the purposes of the project, the proposed usage rates should fall within the equipment usage rates outlined by the United States Army Corps of Engineers (USACE) within their Construction Equipment Ownership and Operating Expense Scheduled (EP 1110-1-8) which can be found at [http://www.publications.usace.army.mil/Portals/76/Publications/EngineerPamphlets/EP\\_1110-1-8.pdf](http://www.publications.usace.army.mil/Portals/76/Publications/EngineerPamphlets/EP_1110-1-8.pdf).

**If the proposal is selected for award and the awarding Grants Officer determines that the proposed rates fall within those outlined within the USACE publication, no further documentation for this item of cost shall be requested during budget negotiations.**

### *Materials and Supplies*

Itemize supplies by major category, unit price, quantity, and purpose, such as whether the items are needed for office use, research, or construction. Identify how these costs were estimated (e.g., quotes, past experience, engineering estimates, or other methodology).

### *Contractual*

Identify all work that will be accomplished by subrecipients, consultants, or contractors, including a breakdown of all tasks to be completed, and a detailed budget estimate of time, rates, supplies, and materials that will be required for each task. Identify how the budgeted costs for subrecipients, consultants, or contractors were determined to be fair and reasonable. *Note: If a subrecipient, consultant, or contractor is proposed and approved at the time of award, no other approvals will be required. Any changes or additions will require a request for approval.*

**If the proposal is selected for award and the awarding Grants Officer determines that all contractual engineering services costs for design engineering and/or construction management costs within the budget**

**proposal do not exceed 8% of total project construction costs, then no further documentation for this item of cost shall be requested during budget negotiations.**

*Environmental and Regulatory Compliance Costs*

If the proposed project includes ground disturbing activities, the applicant must include a line item in their budget to cover environmental compliance costs. “Environmental compliance costs” refer to costs incurred by Reclamation and the recipient in complying with environmental regulations applicable to an award under this FOA, including costs associated with any required documentation of environmental compliance, analyses, permits, or approvals.

Applicable Federal environmental laws could include NEPA, ESA, NHPA, CWA, and other regulations depending on the project. Such costs may include, but are not limited to:

- The cost incurred by Reclamation to determine the level of environmental compliance required for the project
- The cost incurred by Reclamation, the recipient, or a consultant to prepare any necessary environmental compliance documents or reports
- The cost incurred by Reclamation to review any environmental compliance documents prepared by a consultant
- The cost incurred by the recipient in acquiring any required approvals or permits, or in implementing any required mitigation measures

The amount of the line item should be based on the actual expected environmental compliance costs for the project, including Reclamation’s cost to review environmental compliance documentation. However, the minimum amount budgeted for environmental compliance should be equal to at least one to two percent of the total project costs. If the amount budgeted is less than one to two percent of the total project costs, you must include a compelling explanation of why less than one to two percent was budgeted.

How environmental compliance activities will be performed (e.g., by Reclamation, the applicant, or a consultant) and how the environmental compliance funds will be spent, will be determined pursuant to subsequent agreement between Reclamation and the applicant. The amount of funding required for Reclamation to conduct any environmental compliance activities, including Reclamation’s cost to review environmental compliance documentation, will be withheld from the Federal award amount and placed in an environmental compliance account to cover such costs. If any portion of the funds budgeted for environmental compliance is not required for compliance activities, such funds may be reallocated to the project, if appropriate.

### *Other Expenses*

Any other expenses not included in the above categories shall be listed in this category, along with a description of the item and why it is necessary. No profit or fee will be allowed.

### *Indirect Costs*

Applicants with a federally approved indirect cost rate agreement may include indirect costs as part of the project budget. Show the agreed upon rate, cost base, and proposed amount for allowable indirect costs. It is not acceptable to simply incorporate indirect rates within other direct cost line items.

If the applicant has never received a Federal negotiated indirect cost rate, the budget may include a *de minimis* indirect cost rate of up to 10 percent against a base of modified total direct costs. For further information on modified total direct costs, refer to 2 CFR §200.68 available at [www.ecfr.gov](http://www.ecfr.gov).

### *Total Costs*

Indicate total amount of project costs, including the Federal and non-Federal cost share amounts.

## **D.3. Unique Entity Identifier and System for Award Management**

All applicants (unless the applicant has an exception approved by Reclamation under 2 CFR §25.110[d]) are required to:

- (i) Be registered in the System for Award Management (SAM) before submitting its application;
- (ii) Provide a valid unique entity identifier in its application; and
- (iii) Continue to maintain an active SAM registration with current information at all times during which it has an active Federal award or an application or plan under consideration by a Federal awarding agency.

**Meeting the requirements set forth above is mandatory.** If the applicant is unable to provide a unique entity identifier or complete SAM registration by the application deadline, the valid unique entity identifier must be obtained and SAM registration must be initiated within 30 days after the date the application is submitted in order to be considered for selection and award.

Reclamation will not make a Federal award to an applicant until the applicant has complied with all applicable unique entity identifier and SAM requirements and if an applicant has not fully complied with the requirements by the time

Reclamation is ready to make an award, Reclamation may determine that the applicant is not qualified to receive a Federal award and use that determination as a basis for making a Federal award to another applicant.

## **D.4. Submission Date and Time**

Proposals will be accepted, evaluated, and selected on a rolling-basis through the final application submission deadline. The close date for this FOA and final application submission deadline is:

April 27, 2017 at 4:00 p.m. Mountain Daylight Time (MDT)

Proposals received after the application deadline will not be considered unless it can be determined that the delay was caused by Federal government mishandling.

*Please note that any application submitted for funding under this FOA may be subjected to a Freedom of Information Act request (5 USC Section 552, as amended by P.L. No. 110-175), and as a result, may be made publicly available. Following awards of funding, Reclamation may post all successful applications on the Reclamation website, [www.usbr.gov/watersmart/grants.html](http://www.usbr.gov/watersmart/grants.html), after conducting any redactions determined necessary by Reclamation, in consultation with the recipient.*

### **D.4.1. Application Delivery Instructions**

Applications may be submitted electronically through Grants.gov ([www.grants.gov](http://www.grants.gov)) or hard copies may be submitted to either one of the following addresses. Under no circumstances will applications received through any other method (such as email or fax) be considered eligible for award.

By mail: Bureau of Reclamation  
Financial Assistance Operations  
Attn: Mr. Darren Olson  
Mail Code: 84-27852  
P.O. Box 25007  
Denver, CO 80225

By express delivery: Bureau of Reclamation mail services  
Attn: Mr. Darren Olson  
Denver Federal Center  
Bldg. 67, Rm. 152  
6th Avenue and Kipling Street  
Denver, CO 80225

## Section D. Application and Submission Information

By courier services: Bureau of Reclamation  
Attn: Mr. Darren Olson  
Denver Federal Center  
Bldg. 56, Rm. 1000  
6th Avenue and Kipling Street  
Denver, CO 80225

### ***D.4.2. Instructions for Submission of Project Application***

Each applicant shall submit an application in accordance with the instructions contained in this section.

#### **D.4.2.1. Applications Submitted by Mail, Express Delivery or Courier Services**

Please follow these instructions to submit your application by mail, express delivery, or courier services.

- Applicants shall submit one copy of all application documents for hardcopy submissions. Only use a binder clip for documents submitted. Do not staple or otherwise bind application documents.
- Hard copy applications may be submitted by mail, express delivery, or courier services to the addresses identified in this FOA.
- Materials arriving separately will not be included in the application package and may result in the application being rejected or not funded. This does not apply to funding commitment letters or official resolutions.
- Faxed and emailed copies of application documents will not be accepted.
- Do not include a cover letter or company literature/brochure with the application. All pertinent information must be included in the application package.

#### **D.4.2.2. Applications Submitted Electronically**

If the applicant chooses to submit an electronic application, it must be submitted through Grants.gov ([www.grants.gov](http://www.grants.gov)). Reclamation encourages applicants to submit their applications for funding electronically at: [www.grants.gov/applicants/apply-for-grants.html](http://www.grants.gov/applicants/apply-for-grants.html). Applicant resource documents and a full set of instructions for registering with Grants.gov ([www.grants.gov](http://www.grants.gov)) and completing and submitting applications online are available at: [www.grants.gov/applicants/apply-for-grants.html](http://www.grants.gov/applicants/apply-for-grants.html).

- Please note that submission of an application electronically requires prior registration through Grants.gov, which may take 7 to 21 days. Please see registration instructions at [www.grants.gov/applicants](http://www.grants.gov/applicants).

[apply-for-grants.html](#). In addition, please note that the Grants.gov system only accepts applications submitted by individuals that are registered and active in SAM as both a user and an Authorized Organizational Representative.

- Applicants have experienced significant delays when attempting to submit applications through Grants.gov. If you plan to submit your application through Grants.gov you are encouraged to submit your application several days prior to the application deadline. If you are a properly registered Grants.gov applicant and encounter problems with the Grants.gov application submission process, you must contact the Grants.gov Help Desk to obtain a case number. This case number will provide evidence of your attempt to submit an application prior to the submission deadline.

*Regardless of the delivery method used, you must ensure that your proposal arrives by the date and time deadline stated in this FOA. Applications received after this date and time due to weather or express delivery/courier performance will not be considered for award. Late applications will not be considered unless it is determined that the delay was caused by Federal government mishandling or by a problem with the Grants.gov application system.*

#### **D.4.2.3. Acknowledgement of Application Receipt.**

If an application is submitted by mail, express delivery, or courier, Reclamation will notify you in writing that your application was received and whether it was received prior to the deadline identified in the FOA.

If an application is submitted through Grants.gov, you will receive an email acknowledging receipt of the application from Grants.gov. In addition, Reclamation will notify you in writing that your application was retrieved from Grants.gov.

### **D.5. Intergovernmental Review**

This FOA is not subject to Executive Order 12372, “Intergovernmental Review of Federal Programs.”

### **D.6. Funding Restrictions: Pre-award Costs**

Project pre-award costs that have been incurred prior to the date of award but after July 1, 2016, may be submitted for consideration as an allowable portion of the recipient's cost share for the project. **In no case will pre-award costs incurred prior to July 1, 2016, be considered for cost-share purposes.**

For example, such costs might include design or construction plans and environmental compliance costs directly supporting the proposed project. Reclamation will review the proposed pre-award costs to determine if they are

allowable in accordance with the authorizing legislation and applicable cost principles. To be considered allowable, any pre-award costs proposed for consideration under the new awards must comply with all applicable requirements under this FOA.

### **D.7. Automated Standard Application for Payments Registration**

All applicants must also be registered with and willing to process all payments through the Department of Treasury Automated Standard Application for Payments (ASAP) system. All recipients with active financial assistance agreements with Reclamation must be enrolled in ASAP under the appropriate Agency Location Code(s) and the Data Universal Number System (DUNS) Number prior to the award of funds. If a recipient has multiple DUNS numbers they must separately enroll within ASAP for each unique DUNS Number and/or Agency. All of the information on the enrollment process for recipients, including the enrollment initiation form and the enrollment mailbox can be found at [www.usbr.gov/mso/aamd/asap.html](http://www.usbr.gov/mso/aamd/asap.html).

Note that if your entity is currently enrolled in the ASAP system with an agency other than Reclamation, you must enroll specifically with Reclamation in order to process payments.

This page is intentionally left blank.

## Section E. Application Review Information

### E.1. Evaluation Criteria

The evaluation criteria portion of your application should thoroughly address each of the following criteria and subcriteria in the order presented to assist in the complete and accurate evaluation of your proposal. **Applications will be evaluated against the evaluation criteria (listed below), which comprise a total of 100 points.** Please note that projects may be prioritized to ensure balance among the WaterSMART Grants funding categories and to ensure that the projects address the goals of this FOA.

*It is suggested that applicants copy and paste the evaluation criteria and sub-criteria immediately below into their applications to ensure that all necessary information is adequately addressed.*

#### **E.1.1. Evaluation Criterion A—Planning Efforts Supporting the Project (35 points)**

Up to **35 points** may be awarded based on the extent to which the proposed on-the-ground project is supported by an applicant's existing water management plan, water conservation plan, System Optimization Review (SOR), or identified as part of another planning effort led by the applicant.

Describe how your project is supported by an existing planning effort.

- Does the proposed project implement a goal or address a need or problem identified in the existing planning effort?
- Explain how the proposed project has been determined as a priority in the existing planning effort as opposed to other potential projects/measures.

#### **E.1.2. Evaluation Criterion B—Project Benefits (35 points)**

Up to **35 points** may be awarded upon evaluation of the benefits that are expected to result from implementing the proposed project. This criterion considers a variety of project benefits, including improving the management of water supplies, the significance of the anticipated water management benefits, the public benefits of the project, and any expected environmental benefits.

- Describe the expected benefits and outcomes of implementing the proposed project.
  - What are the benefits to the applicant's water supply delivery system?

- If other benefits are expected explain those as well. Consider the following:
  - Extent to which the proposed project improves overall water supply reliability
  - The expected scope of positive impact from the proposed project (e.g., local, sub-basin, basin)
  - Extent to which the proposed project will increase collaboration and information sharing among water managers in the region
  - Any anticipated positive impacts/benefits to local sectors and economies (e.g., agriculture, environment, recreation, tourism)

***E.1.3. Evaluation Criterion C—Project Implementation  
(15 points)***

Up to **15 points** may be awarded based upon the extent to which the applicant is capable of proceeding with the proposed project upon entering into a financial assistance agreement. Applicants that describe a detailed plan (e.g., estimated project schedule that shows the stages and duration of the proposed work, including major tasks, milestones, and dates) will receive the most points under this criterion.

- Describe the implementation plan for the proposed project. Please include an estimated project schedule that shows the stages and duration of the proposed work, including major tasks, milestones, and dates.
- Describe any permits that will be required, along with the process for obtaining such permits.
- Identify and describe any engineering or design work performed specifically in support of the proposed project.
- Describe any new policies or administrative actions required to implement the project.

#### ***E.1.4. Evaluation Criterion D—Nexus to Reclamation (15 points)***

Up to **15 points** may be awarded based on the extent that the proposal demonstrates a nexus between the proposed project and a Reclamation project or activity. Describe the nexus between the proposed project and a Reclamation project or activity, including:

- How is the proposed project connected to a Reclamation project or activity?
- Will the project help Reclamation meet trust responsibilities to any tribe(s)?
- Does the applicant receive Reclamation project water?
- Is the project on Reclamation project lands or involving Reclamation facilities?
- Is the project in the same basin as a Reclamation project or activity?
- Will the proposed work contribute water to a basin where a Reclamation project is located?

### **E.2. Review and Selection Process**

The Federal government reserves the right to reject any and all applications which do not meet the requirements of this FOA or which are outside the scope of WaterSMART Grants: Small-Scale Water Efficiency Projects. Awards will be made for Projects most advantageous to the Government. Award selection may be made to maintain balance among the program tasks listed in *Section C.3.1. Eligible Projects*. The evaluation process will be comprised of the steps described in the following subsections.

#### ***E.2.1. Initial Screening***

All applications will be screened to ensure that:

- The applicant meets the eligibility requirements stated in this FOA.
- The applicant meets the unique entity identifier and SAM registration requirements stated in this FOA (this may be completed up to 30 days after the application deadline).
- The application meets the requirements of the FOA package, including submission of technical and budget proposals, a funding plan, letter(s) of commitment, and related forms.

- The application contains a properly executed SF-424 Application for Financial Assistance and form SF-424B Assurances Non-Construction Programs or SF-424D Assurances Construction Programs, and a completed SF-424A Budget Information Non-Construction Programs or SF-424C Budget Information Construction Programs.
- The application includes an official resolution, adopted by the applicant's board of directors, governing body, or appropriate authorized official (this may be submitted up to 30 days after the application deadline).
- The application and funding plan meets or exceeds the minimum non-Federal cost share requirements identified in this FOA.
- The project can be completed by September 30, 2019.

**Reclamation reserves the right to remove an application from funding consideration if it does not pass all Initial Screening criteria listed above.** An applicant that has submitted an application that is determined to be ineligible for funding will be notified along with other applicants, or sooner, if possible.

### ***E.2.2. Application Review Committee***

Evaluation criteria will comprise the total evaluation weight as stated in *Section E.1. Evaluation Criteria*. Applications will be scored against the evaluation criteria by an Application Review Committee (ARC), made up of experts in relevant disciplines selected from across Reclamation. The ARC will also review the application to ensure that the proposed project meets the description of eligible projects and meets the objective of this FOA.

During the ARC review, Reclamation may contact applicants to request clarifications to the information provided, if necessary.

### ***E.2.3. Red-Flag Review***

Following the results of the ARC review, Reclamation will review the top-ranking applications and identify any reasons why a proposed project would not be feasible or otherwise advisable, including environmental or cultural resources compliance issues, permitting issues, legal issues, or financial position. Positive or negative past performance by the applicant and any partners in previous working relationships with Reclamation may be considered, including whether the applicant is making significant progress toward the completion of outstanding financial assistance agreements and whether the applicant is in compliance with all reporting requirements associated with previously funded projects.

In addition, during this review Reclamation will address any specific concerns or questions raised by members of the ARC, conduct a preliminary budget review, and evaluate the applicant's ability to meet cost share as required.

#### ***E.2.4. Managerial Review***

Reclamation management will prioritize projects to ensure the total amount of all awards does not exceed available funding levels. Management will also ensure that all projects meet the scope, priorities, requirements, and objectives of this FOA. Management may also prioritize projects to ensure that multiple project types are represented.

#### ***E.2.5. Pre-Award Clearances and Approvals***

The following pre-award clearances and approvals must be obtained before an award of funding is made. If the results of these pre-award reviews and clearances are satisfactory, the award of funding will be made once the agreement is finalized (approximately one to three months from the date of initial selection). If the results of pre-award reviews and clearances are unsatisfactory, consideration of funding for the project may be withdrawn.

##### **E.2.5.1 Environmental Review**

Reclamation will forward all proposals selected for award consideration to the appropriate Reclamation Regional or Area Office for completion of environmental compliance. To the extent possible, environmental compliance will be completed before a financial assistance agreement is signed by the parties. However, in most cases, the award will be made contingent on completion of environmental compliance. The financial assistance agreement will describe how compliance will be carried out and how the costs will be paid. Ground disturbing activities may not occur until this second level of environmental analysis is completed.

##### **E.2.5.2 Budget Analysis and Business Evaluation**

A Reclamation Grants Officer will also conduct a detailed budget analysis and complete a business evaluation and responsibility determination. During this evaluation, the Grants Officer will consider several factors that are important, but not quantified, such as:

- Allowability, allocability, and reasonableness of proposed costs
- Financial strength and stability of the applicant
- Past performance, including satisfactory compliance with all terms and conditions of previous awards, such as environmental compliance issues, reporting requirements, proper procurement of supplies and services, and audit compliance
- Adequacy of personnel practices, procurement procedures, and accounting policies and procedures, as established by applicable Office of Management and Budget circulars

### **E.3. Anticipated Announcement and Federal Award Date**

Reclamation will accept proposals on a continuous basis for this FOA, therefore it is not possible to establish a fixed award date. Reclamation will complete proposal review and evaluations as soon as practicable after the proposals are submitted.

Within one to three months after that date, financial assistance agreements will be awarded to applicants that successfully pass all pre-award reviews and clearances.

The tentative selection and announcement timeframe is:

- March 2017 for proposals submitted by January 13, 2017
- June 2017 for proposals submitted after January 13, 2017

## Section F. Federal Award Administration Information

### F.1. Federal Award Notices

Successful applicants will receive by electronic mail, a notice of selection signed by a Reclamation Grants Officer. This notice is not an authorization to begin performance.

### F.2. Administrative and National Policy Requirements

#### ***F.2.1. Environmental and Cultural Resources Compliance***

All projects being considered for award funding will require compliance with the National Environmental Policy Act (NEPA) before any ground-disturbing activity may begin. Compliance with all applicable state, Federal and local environmental, cultural, and paleontological resource protection laws and regulations is also required. These may include, but are not limited to, the Clean Water Act (CWA), the Endangered Species Act (ESA), the National Historic Preservation Act (NHPA), consultation with potentially affected tribes, and consultation with the State Historic Preservation Office.

Reclamation will be the lead Federal agency for NEPA compliance and will be responsible for evaluating technical information and ensuring that natural resources, cultural, and socioeconomic concerns are appropriately addressed. As the lead agency, Reclamation is solely responsible for determining the appropriate level of NEPA compliance. Further, Reclamation is responsible to ensure that findings under NEPA, and consultations, as appropriate, will support Reclamation's decision on whether to fund a project. Environmental and cultural resources compliance costs are considered project costs. These costs will be considered in the ranking of applications.

***Under no circumstances may an applicant begin any ground-disturbing activities (e.g., grading, clearing, and other preliminary activities) on a project before environmental and cultural resources compliance is complete and Reclamation explicitly authorizes work to proceed. This pertains to all components of the proposed project, including those that are part of the applicant's non-Federal cost share. Reclamation will provide a successful applicant with information once such compliance is complete. An applicant that proceeds before environmental and cultural resources compliance is complete may risk forfeiting Reclamation funding under this FOA.***

### ***F.2.2. Approvals and Permits***

Applicants shall adhere to Federal, state, territorial, tribal, and local laws, regulations, and codes, as applicable, and shall obtain all required approvals and permits. Applicants shall also coordinate and obtain approvals from site owners and operators.

### ***F.2.3. Requirements for Agricultural Operations under P.L. 111-11, Section 9504(a)(3)(B)***

In accordance with Section 9504(a)(3)(B) of P.L.111-11, grants and cooperative agreements under this authority will not be awarded for an improvement to conserve irrigation water unless the applicant agrees to both of the following conditions:

- Not to use any associated water savings to increase the total irrigated acreage of the eligible applicant
- Not to otherwise increase the consumptive use of water in the operation of the eligible applicant, as determined pursuant to the law of the State in which the operation of the eligible applicant is located

### ***F.2.4. Title to Improvements P.L.111-11, Section 9504(a)(3)(D)***

If the activities funded through an agreement awarded under this FOA result in a modification to a portion of a federally owned facility that is integral to the existing operations of that facility, the Federal government shall continue to hold title to the facility and the improvements thereto. Title to improvements, P.L.111-11, Section 9504(a)(3)(D) that are not integral to existing water delivery operations shall reside with the project sponsor.

### ***F.2.5. Operation and Maintenance Costs under P.L.111 11, Section 9504(a)(3)(E)(iv)***

The non-Federal share of the costs for operation and maintenance of any infrastructure improvement funded through an agreement awarded under this FOA shall be 100 percent.

### ***F.2.6. Liability under P.L.111-11, Section 9504(a)(3)(F)***

#### ***F.2.6.1. In General***

Except as provided under Chapter 171 of Title 28, USC (commonly known as the Federal Tort Claims Act), the United States shall not be liable for monetary damages of any kind for any injury arising out of an act, omission, or occurrence that arises in relation to any facility created or improved through an agreement awarded under this FOA, the title of which is not held by the United States.

#### **F.2.6.2. Tort Claims Act**

Nothing in this section increases the liability of the United States beyond that provided in Federal Tort Claims Act.

### **F.3. Reporting Requirements and Distribution**

Recipients of awards made under this FOA will be required to submit the following reports during the term of the agreement. The specific terms and conditions pertaining to the reporting requirements will be included in the financial assistance agreement.

#### ***F.3.1. Financial Reports***

Recipients will be required to submit a fully completed Form SF-425 Federal Financial Report on at least a semi-annual basis and with the final performance report. The SF-425 must be signed by a person legally authorized to obligate the recipient.

#### ***F.3.2. Interim Program Performance Reports***

Recipients will be required to submit interim performance reports on at least a semi-annual basis. At a minimum, each interim performance report must include the following information:

- A comparison of actual accomplishments to the milestones established by the financial assistance agreement for the period
- The reasons why established milestones were not met, if applicable
- The status of milestones from the previous reporting period that were not met, if applicable
- Whether the project is on schedule and within the original cost estimate
- Any additional pertinent information or issues related to the status of the project

#### ***F.3.3. Final Program Performance Report***

Recipients will be required to submit a final performance report encompassing the entire period of performance. The final performance report must include, but is not limited to the following information:

- Whether the project objectives and goals were met
- Discussion of the benefits achieved by the project

- Photographs documenting the project, if available

Note: Reclamation may print photos with appropriate credit to the applicant. Also, final reports are public documents and may be made available on Reclamation's website, [www.usbr.gov/watersmart/grants.html](http://www.usbr.gov/watersmart/grants.html).

## **F.4. Releasing Applications**

Following awards of funding, Reclamation may post all successful applications on the Reclamation website after conducting any redactions determined necessary by Reclamation, in consultation with the recipient.

## Section G. Agency Contacts

There will be no pre-application conference. Organizations or individuals interested in submitting applications in response to this FOA may direct questions to the Reclamation personnel identified below.

### G.1. Reclamation Financial Assistance Management Contact

Questions regarding application and submission information and award administration may be submitted to the attention of Mr. Darren Olson, Grants Management Specialist, as follows:

By mail: Bureau of Reclamation  
Financial Assistance Operations  
Attn: Mr. Darren Olson  
Mail Code: 84-27852  
P.O. Box 25007  
Denver, CO 80225

By email: [dolson@usbr.gov](mailto:dolson@usbr.gov)

By phone: 303-445-3697

### G.2. Reclamation Program Coordinator Contact

Questions regarding applicant and project eligibility and application review may be submitted to the attention of Mr. Darion Mayhorn, Program Analyst, as follows:

By mail: Bureau of Reclamation  
Water Resources and Planning  
Attn: Mr. Darion Mayhorn  
Mail Code: 84-51000  
P.O. Box 25007  
Denver, CO 80225

By e-mail: [dmayhorn@usbr.gov](mailto:dmayhorn@usbr.gov)

By phone: 303-445-3121

## Section H. Other Information

The following is a brief overview of NEPA, NHPA, and ESA. While these statutes are not the only environmental laws that may apply to Small-Scale Water Efficiency Projects, they are the Federal laws that most frequently do apply. Compliance with all applicable environmental laws will be initiated by Reclamation concurrently, immediately following the initial recommendation to award a Small-Scale Water Efficiency Project Grant. The descriptions below are intended to provide you with information about the environmental compliance issues that may apply to your projects and to help you budget appropriately for the associated compliance costs.

### H.1. National Environmental Policy Act

NEPA requires Federal agencies such as Reclamation to evaluate, during the decision-making process, the potential environmental effects of a proposed action and any reasonable mitigation measures. Before Reclamation can make a decision to fund a Small-Scale Water Efficiency Project Grant, Reclamation must comply with NEPA. Compliance with NEPA can be accomplished in several ways, depending upon the degree and significance of environmental impacts associated with the proposal:

Some projects may fit within a recognized **Categorical Exclusion (CE)** to NEPA (i.e., one of the established categories of activities that generally do not have significant impacts on the environment). If a project fits within a CE, no further NEPA compliance measures are necessary. Use of a CE can involve simple identification of an applicable **Interior CE** or documentation of a **Reclamation CE** using a **Categorical Exclusion Checklist (CEC)**. If a CE is being considered, Reclamation will determine the applicability of the CE and whether extraordinary circumstances (i.e., reasons that the CE cannot be applied) exist. That process can take anywhere from 1 day to about 30 days, depending upon the specific situation.

If the project does not fit within a CE, compliance with NEPA might require preparation of an **Environmental Assessment/Finding of No Significant Impact (EA/FONSI)**. Generally, where no CE applies but there are not believed to be any significant impacts associated with the proposed action, an EA will be required. The EA is used to determine whether any potentially significant effects exist (which would trigger the further step of an **Environmental Impact Statement (EIS)**, below). If no potentially significant effects are identified, the EA process ends with the preparation of a FONSI. The EA/FONSI process is more detailed than the CE/CEC process and can take weeks or even months to complete. Consultation with other agencies and public notification are part of the EA process.

The most detailed form of NEPA compliance, where a proposed project has potentially significant environmental effects, is completion of an **EIS** and **Record**

**of Decision (ROD).** An EIS requires months or years to complete, and the process includes considerable public involvement, including mandatory public reviews of draft documents. It is not anticipated that projects proposed under this program will require completion of an EIS.

During the NEPA process, potential impacts of a project are evaluated in context and in terms of intensity (e.g., will the proposed action affect the only native prairie in the county? Will the proposed action reduce water supplied to a wetland by 1 percent? or 95 percent?). The best source of information concerning the potentially significant issues in a project area is the local Reclamation staff that has experience in evaluating effects in context and by intensity.

Reclamation has the sole discretion to determine what level of environmental NEPA compliance is required. If another Federal agency is involved, Reclamation will coordinate to determine the appropriate level of compliance. You are encouraged to contact your regional or area Reclamation office. See [www.usbr.gov/main/offices.html](http://www.usbr.gov/main/offices.html) with questions regarding NEPA compliance issues. You may also contact the Program Coordinator (*see Section G. Agency Contacts*) for further information.

## **H.2. National Historic Preservation Act**

To comply with Section 106 of the NHPA, Reclamation must consider whether a proposed project has the **potential to cause effects to historic properties**, before it can award a Small-Scale Water Efficiency Project Grant. Historic properties are cultural resources (historic or prehistoric districts, sites, buildings, structures, or objects) that qualify for inclusion in the National Register of Historic Places. In some cases, water delivery infrastructure that is over 50 years old can be considered a historic property that is subject to review.

If a proposal is selected for initial award, Small-Scale Water Efficiency Project Grant recipients will work with Reclamation to complete the Section 106 process. Compliance can be accomplished in several ways, depending on how complex the issues are, including:

- If Reclamation determines that the proposed project does not have the potential to cause effects to historic properties then Reclamation will document its findings and the Section 106 process will be concluded. This can take anywhere from a couple of days to one month.
- If Reclamation determines that the proposed project could have effects on historic properties, a multi-step process, involving consultation with the State Historic Preservation Officer and other entities, will follow. Depending on the nature of the project and impacts to cultural resources, consultation can be complex and time consuming. The process includes:

- A determination as to whether additional information is necessary
  - Evaluation of the significance of identified cultural resources
  - Assessment of the effect of the project on historic properties
  - A determination as to whether the project would have an adverse effect and evaluation of alternatives or modifications to avoid, minimize, or mitigate the effects
  - A Memorandum of Agreement is then used to record and implement any necessary measures. At a minimum, completion of the multi-step Section 106 process takes about two months.
- Among the types of historic properties that might be affected by Small-Scale Water Efficiency Project Grants are **historic irrigation systems** and **archaeological sites**. An irrigation system or a component of an irrigation system (e.g., a canal or headgate) is more likely to qualify as historic if it is more than 50 years old, if it is the oldest (or an early) system/component in the surrounding area, and if the system/component has not been significantly altered or modernized. In general, Small-Scale Water Efficiency Projects that involve ground disturbance, or the alteration of existing older structures, are more likely to have the potential to affect cultural resources. However, the level of cultural resources compliance required, and the associated cost, depends on a case-by-case review of the circumstances presented by each proposal.

You should contact your State Historic Preservation Office and your local Reclamation office's cultural resources specialist to determine what, if any, cultural resources surveys have been conducted in the project area. See [www.usbr.gov/cultural/crmstaff.html](http://www.usbr.gov/cultural/crmstaff.html) for a list of Reclamation cultural resource specialists. If an applicant has previously received Federal financial assistance it is possible that a cultural resources survey has already been completed.

### H.3. Endangered Species Act

Pursuant to Section 7 of the ESA, each Federal agency is required to consult with the U.S. Fish and Wildlife Service (USFWS) or the National Oceanic and Atmospheric Administration (NOAA) Fisheries Service to ensure any action it authorizes, funds, or carries out is not likely to **jeopardize the continued existence of any endangered or threatened species or destroy or adversely modify any designated critical habitat**.

Before Reclamation can approve funding for the implementation of a Small-Scale Water Efficiency Project Grant, it is required to comply with Section 7 of the ESA. The steps necessary for ESA compliance vary, depending on the presence of

endangered or threatened species and the effects of the proposed project. A rough overview of the possible course of ESA compliance is:

- If Reclamation can determine that there are no endangered or threatened species or designated critical habitat in the project area, then the ESA review is complete and no further compliance measures are required. This process can take anywhere from one day to one month.
- If Reclamation determines that endangered or threatened species may be affected by the project, then a **Biological Assessment** must be prepared by Reclamation. The Biological Assessment is used to help determine whether a proposed action may affect a listed species or its designated critical habitat. The Biological Assessment may result in a determination that a proposed action **is not likely to adversely affect** any endangered or threatened species. If the USFWS/NOAA Fisheries Service concurs in writing, then no further consultation is required and the ESA compliance is complete. Depending on the scope and complexity of the proposed action, preparation of a Biological Assessment can range from days to weeks or even months. The USFWS/NOAA Fisheries Service generally respond to requests for concurrence within 30 days.
- If it is determined that the project **is likely to adversely affect listed species**, further consultation (**formal consultation**) with USFWS or NOAA Fisheries Service is required to comply with the ESA. The process includes the creation of a **Biological Opinion** by the USFWS/NOAA Fisheries Service, including a determination of whether the project would **jeopardize** listed species and, if so, whether any **reasonable and prudent** alternatives to the proposed project are necessary to avoid jeopardy. Nondiscretionary **reasonable and prudent measures** and **terms and conditions** to minimize the impact of incidental take may also be included. Under the timeframes established in the ESA regulations, the Biological Opinion is issued within 135 days from the date that formal consultation was initiated, unless an extension of time is agreed upon.

The time, cost, and extent of the work necessary to comply with the ESA depends upon whether endangered or threatened species are present in the project area and, if so, whether the project might have effects on those species significant enough to require formal consultation.

ESA compliance is often conducted parallel to the NEPA compliance process and, as in the case of a CEC, documented simultaneously. The best source of information concerning the compliance with the ESA in a particular project area is the local Reclamation environmental staff that can be helpful in determining the presence of listed species and possible effects that would require consultation with the USFWS or NOAA Fisheries Service. Contact your regional or area
