The Original Montessori for Dementia Training® Online Course

International Council of Certified Dementia Practitioners and Center for Applied Research in Dementia bring you a Montessori course designed for health care professionals working with older adults who have a diagnosis of dementia. Learn cutting-edge principles and techniques proven to increase engagement and participation in activities in persons with dementia. This 6-hour online course will give you the tools to maximize independence and encourage self-sufficiency in your clients.

For course information visit cen4ard.com/online-training/

Live Webinar Training also available. Email vince@cen4ard.com to bring one of our experts to the staff of your care community. Book early for your next state, national and international conference.
