

**This summer, twelve Ohio State undergraduates were selected to conduct high-caliber, scientific research at Germany's top research institutions as interns through the RISE (Research Internships in Science and Engineering) program.**

"My time in Germany deeply impacted my approach to research, providing a global perspective on scientific inquiry and the interplay between science and society."

- Tyler Merz (B.S. Engineering Physics '11)

After completing his RISE internship, Tyler went on to become a Goldwater Scholar, Churchill Scholar, and NSF Graduate Research Fellow.

The DAAD (German Academic Exchange Service) created the highly competitive RISE program in 2005 to promote international collaboration in the sciences, offering undergraduates in STEM fields from the U.S., the U.K., and Canada the opportunity to work with research groups at universities in Germany during the summer. RISE interns receive a living stipend and are matched with research mentors in their laboratories. Eligible students must have completed at least 2 years of a degree program by the time of the internship placement, and must maintain undergraduate status after the internship has taken place.

## Attend an information Session at Kuhn Honors and Scholars House:

Thursday Oct. 31st

4:00-5:00pm

Friday Nov. 1st

12:00-1:00pm

- Students are matched with a host university
- DAAD provides a monthly stipend for three months
- Host universities provide housing assistance and match students with Ph.D. student mentors
- German language is not required and the working language will be in English
