### Commercial Bus Inspection Advisory

July 31, 2020

To All Commercial Bus Operators:

The New Jersey Motor Vehicle Commission (MVC) conducted commercial bus inspections on a limited basis during the shutdown. Those inspections were suspended for a short time to allow the MVC to focus its resources on the backlog of road test customers. Specification inspections have resumed. The number of inspections will begin to increase in mid- August and will resume to a regular schedule thereafter. We appreciate your patience and understanding as the MVC continues to drive towards a complete resumption of all services.

If you have any questions, please contact us at 609-777-4186.

Sincerely,

Thomas Bednarz, Director  
Inspection Services
