

Demo Days – Fall 22 -Hands on experience with the latest tech

Registration & lunch

Welcome – Introduce the day

Avanan / Harmony – Endpoint and email protection

Provide lab environment, tasks, & goals

Phishing is the initial entry point –

Roughly 90% of data breaches occur on account of phishing. According to the US Federal Bureau of Investigation, phishing attacks may increase by as much as 400% year-over-year and Roughly 65% of cyber attackers have leveraged spear phishing emails as a primary attack vector.

Axonius -- Asset Discovery Tool (CIS #1 & CIS #2)

Provide lab environment, tasks, & goals

Asset discovery correlate/deduplicate/automate (CIS #1 & CIS #2) – These are the basic building blocks of any cyber security program

These fundamentals of any cyber security framework has always been the most difficult and labor intensive to achieve.

Organizations still struggle with manual processes, matching outdated excel documents and relying on agents deployed on the machines. These processes cost labor, are a historic view of an environment, and are outdated the moment the list is correlated due to the dynamic nature of networks today.

Today, we can automatically provide what organizations need to achieve these controls for any framework.
