

TRAUMA 107: TRAUMA-INFORMED CULTURAL SENSITIVITY

Enhancing cultural competence and encouraging cultural humility is essential to increasing access and improving the standard of care for traumatized children, families, and communities. Cultural awareness, responsiveness, and understanding need to be infused at every level to be effective in addressing the needs of those who have experienced trauma. With both presentation and group interaction, participants will identify forces that contribute to behaviors that build or decrease emotional health in individuals and systems.
