

SCENARIO PLANNING IN UNCERTAINTY

Uncertainty is inevitable, especially in our current political climate; but effective leaders will navigate this time with curiosity and forward momentum.

This interactive workshop introduces a scenario mapping tool that integrates the traditional VUCA (Volatility, Uncertainty, Complexity, Ambiguity) framework with the Serenity Prayer, a well-known invocation for peace, wisdom, and resilience. By structuring decisions around acceptance, action, and discernment, leaders can reduce overwhelm, make more effective strategic choices, and focus on meaningful progress rather than getting stuck in reactive or futile efforts.

For leaders and organizations facing complex challenges, this session provides a structured, collaborative tool for setting direction in uncertain environments. Participants will leave with a practical framework, the VUCA template (and bonus 2 X 2 scenario planning tool), and training to use this map in their own systems to anticipate change, align their efforts, and move forward with confidence.

This session will include a graphic recording of key themes, needs, and ideas, which will be shared with all participants! Information will be non-identifying.

Thursday, May 22

12:00-1:15pm
