

In collaboration with:

Data Equity Primer:

Live, Interactive Online Workshop for Bucks-Mont Collaborative

The We All Count Data Equity Primer is a laser-focused, one-hour introduction designed to get you up to speed on the core issues facing the equitable and ethical use of data and provide you with a clear picture of the challenging landscape of turning complex human questions into numbers then back into meaning (without totally screwing people over in the process!).

We all want to make sure that the people we care about are treated fairly in how we collect, analyze, interpret and report on data, but there are many ways that bias, unfairness, and flat-out error creep into the many important choice points that are in every data project.

IN THIS FAST-PACED, EXCITING PRIMER, WE COVER:

- The compelling case for why data projects are not objective (and why that's a good thing!);
- How the kinds of choice points we all face in this field give us to opportunity to embed equity in our work;
- Why we all need a cohesive system for identifying and addressing equity issues in data,
- An introduction to a practical, concrete approach to this crucial issue: The Data Equity Framework.

WHEN ? WHERE?

The workshop will take place online (via Zoom) on:

March 7, 2023, 10:00am-11:30am

This is a one-hour workshop with an optional 30-minute Q&A period immediately following.

HOW DO I ATTEND?

WE ALL COUNT

project for equity
in data science

WHAT TO EXPECT:

This is a live, interactive workshop, private to Bucks-Mont Collaborative, where you will have plenty of opportunities to chat and share your thoughts.

The workshop will take place using the Zoom Webinar function, meaning participants will be off camera and muted. Instead, our interactions will happen in the chat, (so feel free to attend in your pajamas!). After lots of practice, we've found the chat function is the best way to allow everyone to participate at the level that is comfortable for them, and privately if they wish.

Participants are welcome to take personal breaks and step away as needed. Sessions will be recorded and shared internally with the Bucks-Mont Collaborative team for those who are not able to attend in full, or those would like to go back and review.

"I attended your session and I just wanted to say it was absolutely fantastic. It (and you) were incredibly unique, thoughtful, relevant, and creative."

- Nathalie Noel, Strategy Coach

"Thank you Heather for a fantastic workshop today. It was one of the best I have ever attended!"

- Susan Watts, Executive Director EE Centre

"Hands down the best workshop I have ever attended. Has given me the tools to change the way our entire team works with data."

- MD, Children's Aid Society
