

Become a Civil Conversation Workshop Facilitator!

SESSION DESCRIPTION

When a group comes together to have meaningful conversations about deeply held beliefs, it helps to have a facilitator with the knowledge and skills to create spaces of authentic sharing and deep listening. In this moment of polarization, bridge-builders are needed more than ever.

This half-day workshop will give you the tools to organize meaningful dialogue across lines of difference in your communities, congregations, and workplaces.

You will:

- Gain knowledge, techniques, and incremental confidence in conversing across differences.
- Explore case studies and practice skills for navigating conflict in conversations.
- Receive a companion Facilitator Toolkit and Online Resource Guide.
