Advocacy 101:
presented by PA Health Access Network
TCN March Meeting
March 16th 9:00am-10:00am

Join us for a conversation that will include why nonprofit organizations can and should participate in voter registration. Nonprofits are permitted to conduct voter registration and engagement so long as it is done in a nonpartisan manner. This work is about engaging people to register and vote without reference to a particular party or candidate. We will briefly review how this works and why it does not place a 501 c 3 in any jeopardy.

During this discussion, our presenters will talk about their experience, best practices, and resources that are available to support these efforts. We will review the upcoming election, the deadlines to register, and how to register to vote by mail or in person. As a part of the session, we will provide messaging for talking with people about voting, fact sheets, and other information supports for conducting successful voter registration.

Register in advance for this meeting on Zoom:
