

**TCN OCTOBER MEETING**

# *Mental Health Matters: Launching a New Community-Based Screening*

**Tuesday, October  
27th at 9am**

Pottstown Hospital - Tower Health is launching a new community-based mental health screening kiosk. This kiosk will be portable around the community, and community partners can host the kiosk at their site. The kiosk will allow community members to take a quick, anonymous, screening for 13 mental health conditions. Based on the screening results, they will be provided a list of local, state and national resources. This presentation will demonstrate the screening and provide information on how you can bring the kiosk to your organization.
