

# WINTER OF COMPUTER SCIENCE: Changing the World Bit by Bit with Micro:bit

January 25, 2023

## What is Winter of CS?

As part of California's Seasons of CS initiative, our regional Winter of CS celebration brings together expert presenters, research-backed professional learning models, and innovation in computer science for California educators.

- **AUDIENCE:** K-8 Educators
- **PURPOSE:** to provide strategies and experiences with a physical computing device to engage students in computer science practices that can be implemented into core standards.

## Topics Covered:

- Equity in CS education
- Implementation best practices
- Standard Connections
- Engaging CS learning experiences
- Inclusion of all students, including low-income students, students of color, young women, English learners, and students with special needs.

## Changing the World Bit by Bit with Micro:bit

**JANUARY 25, 2023**  
**8am - 3:30pm**

This interactive one-day workshop provides a hands on experience around design thinking, state standard core + CS integration, collaboration, and creating for social good through the use of computer science skills.
