RE: Instructions for Sales in Medical Facilities

Pursuant to the COVID-19 State of Emergency Declaration, the Division of Small Business has the discretion to make additions, amendments, clarifications, exceptions, and exclusions to the list of businesses that may open in Delaware. In making its determinations, the Division of Small Business, in consultation with Division of Public Health, will consider how to prevent, reduce the spread of, and suppress COVID-19 in relation to any activity permitted for any business, organization, establishment, or facility.

Effective June 1, 2020, only doctors, medical personnel, patients and their caregivers or support persons are allowed to enter hospitals and physician's offices. This does not include medical sales associates or non-essential deliveries to these medical facilities. Other business contacts related to hospitals and physician's offices, such as medical sales associates, non-essential deliveries will be subject to further modification in future emergency orders.

This prohibition, which is necessary in order to safeguard the health and welfare of Delaware citizens during the COVID-19 pandemic, is in effect until further notice.
