

HEPATITIS C INTERVENTION SYMPOSIUM

Join us for a Symposium on the practical aspects of implementing innovative interventions for hepatitis C virus (HCV), including point-of-care testing, telehealth, peer support, care navigation and case finding.

This symposium will showcase best practice models of care, highlighting key research, challenges and learnings in a collaborative environment, with the aim of supporting participants to develop or enhance their own HCV or HIV models of care.

It is intended for anyone working with people who use drugs, interested in implementing or scaling up interventions for HCV and harm reduction in their service setting, including doctors, nurses, frontline workers, peer workers, program managers, pharmacists, and policymakers from a variety of settings.

By the end of this symposia, you will be able to:

1. Understand evidence-based interventions demonstrated to enhance the HCV care cascade
2. Understand the HCV care cascade and be able to identify areas for enhancement in service delivery
3. Describe how a range of interventions work and how they can be implemented to enhance models of HCV and integrated HIV care and overcome barriers to case finding, testing, diagnosis and linkage to care
4. Identify suitable interventions to enhance service delivery
5. Analyze barriers of implementing successful interventions and how to overcome them

There are three elements:

-  The practical sessions in the symposia draw from our [HCV Intervention Toolkit](#)
-  The symposia will bring these interventions to life, providing the practical skills and knowledge needed to implement or scale up interventions in your service
-  Post-training, participants will have access to an ongoing community of support

Date: Wednesday March 18, 2026

Time: 9:30am-3:00pm (catering included)

Location: Tinkham Veale University Center (TVUC), at Case Western Reserve University
11038 Bellflower Rd, Cleveland, OH 44106, United States

Cost:

Attendance is free and open to all, but places are limited and granted on a first-come, first-served basis. Registration is essential.
