

# Healthy Aging in People with Epilepsy Program

We invite healthcare providers caring for adults with epilepsy to join a Community Engagement (CE) Studio and help shape the Healthy Aging in People with Epilepsy (HAP-E) Program, supporting brain health and well-being as people age.

## Who Can Participate?

Healthcare providers who treat adults age 55+ with epilepsy and who are:

- Neurologists
- Epileptologists
- Primary Care Providers
- Nurses
- Physician Assistants
- Advanced Practice Clinicians

AND

- Prescribe anti-seizure medications to adult patients diagnosed with epilepsy

## What's Involved?

- Attend a 2-hour virtual CE Studio session
- Share experiences and provide feedback with fellow providers and Ohio-based researchers
- Help shape the development and implementation of the HAP-E Program
- Receive \$100 as a thank you for your participation
