

Triangle East Chamber of Commerce

The Triangle East Chamber has proactively connected our members and communities to needed resources during the changes caused by COVID-19. We facilitated the donations of needed medical supplies for our local hospital, created a webpage to highlight the changes implemented by businesses and services in our area, moved networking and learning opportunities to online platforms, and helped local food distributors to find locations for bulk sales to the public. Most recently, we partnered with Sysco Raleigh to host two pop-up shops. In order to create an efficient and safe way for residents to have access to proteins, pantry items, and paper products, the Chamber and Sysco created a pre-pay, drive-through pick up model. As this season continues to evolve, it's the goal of our Chamber to quickly adapt and provide needed resources and connections for our businesses and community members.
