CLASS DESCRIPTION

MULTI SPORT

CORBIN'S CRUSADERS

Why try one sport all season long when you can play one or more every day? Rotating through sports offers broader exposure, greater understanding of "team" and allows the kids to determine their favorites for themselves. Soccer, football, baseball, dodgeball, and more!

FLAG FOOTBALL

CORBIN'S CRUSADERS

This is our most popular program at Corbin's Crusaders. Each week, players are coached on skills and compete in a league with their age bracket. We have standings, playoffs and a superbowl. From the rules and basics of football to advanced game strategy, this program offers athletes healthy competition and excitement each week.

DODGEBALL AND SOCCER

HI-FIVE SPORTS CLUB METRO

We will focus on Soccer and Dodgeball. A unique class where we will introduce sports that are generally played on the field. Children will learn the fundamentals of various sports and improve at games such as dodgeball and soccer.

STEM FUNDAMENTALS WITH LEGO® MATERIALS

PLAY-WELL TEKNOLGIES

Level up your engineering skills with Play-Well TEKnologies and tens of thousands of LEGO® parts! Apply real-world concepts in physics, engineering, and architecture through engineer-designed projects such as: Cars, Helicopters and Treehouses. Design and build as never before and explore your craziest ideas.

ROBOTICS WITH MBOTS

MAKEINSPIRES EDUCATION

Robots are being used everywhere, from shopping centers to hospitals and everything in between. Every single robot was first programmed by humans... Experience how to program robots first hand through block based code, similar to scratch. With this fun and easy to use programming language we code the mBot Robots to perform various challenges! Mbot has a build in distance sensor, color sensor, lights, sounds and more - all able to be controlled and manipulated through important programming concepts students will learn, such as loops, conditional statements, variables and more. Robots also teach us a lot about math through measuring distance and angles.

3D PRINTING I

MAKEINSPIRES EDUCATION

Inspire students to create 3D structures using design based thinking! Students learn the basics of 3D design & printing by initially creating a house – anything from their future home to a lunar dwelling – using the application of math, science, art and technology skills in a fun way! Students work towards mastering skills by creating a product, toy or model. 3D encourages students to think creatively to produce anything from recreating their favorite droid to a designing tablet stand – whatever they can dream up! This course is a great introduction into the exploration of 3D printing from design to production! Materials fee covers one 3D print for every two classes. Part II takes the techniques learned in Part I to the next level with 3D Printed Product Design. In this enrollment students will learn how to solve a problem or need with a 3D printed product of their own design. Can't get that last bit of toothpaste out? Design and print a toothpaste squeezer! Creating products that will be used in real life applications requires proper planning, measurement, prototyping and testing, and learning from mistakes to make the product perfect. It's amazing for students to build on key STEAM skills and experience the process of envisioning a product, designing and creating it, and then physically holding it in their hands days later!

Camps, care, and enrichment programs designed to educate, entertain, and engage students.

CLASS DESCRIPTION

CHESS CLUB

CHESS WIZARDS

Enter into the magical and exciting world of chess with Chess Wizards! You will participate in epic chess games, fun and interactive lessons, tournaments, team matches, trivia and more! Our specialized classes are a blast for everyone first through fifth. Whether you have been playing chess for your entire life and want to improve, are brand new to the game, or you just want to have a fun experience with your friends - Chess Wizards is the place for you!

CLAY SCULPTURE

AN INSPIRED EMPTY VESSEL

Make amazing sculptures of some of your favorite animals with Polymer Clay! Learn the secret of making larger sculptures without using a lot of clay! All of your projects will be baked by Ms. Baehr, and returned to you the following week. This hands-on class has been developed for, and taught at Webster Magnet School in New Rochelle for many years. It will provide the structural basis and skill set that will allow you to build whatever you can imagine!

PAINT YOUR OWN POTTERY: TECHNIQUES

MADE: MY ART + DESIGN EXPERIENCE

The perfect way to unwind and get creative after school! We'll explore different techniques in ceramic painting, including masquing, silk screening, etching, stamping, and more. One new project per student each week, with beautiful fired pieces returned in 1-2 weeks! Class hosted by MADE: my art + design experience

ROOM TO BLOOM, SPRING 2022

TRENDY CRAFTS

Let your child's creativity bloom this spring while they create new process arts and crafts projects each week! This session, Trendy Crafts is going all out with a Spring theme, we will make mixed media bird houses, a pom-pom peace canvas, a very sweet Mother's Day surprise and so much more.

SPORTS SAMPLER

HI-FIVE SPORTS CLUB METRO

"We know it's important to keep this age group engaged so we will introduce a new team sport every week! Sports covered will be baseball, ultimate football, basketball, hockey & fitness. Our academic inclusion curriculum combine S.T.E.A.M principles with sports. Fitness and S.T.E.A.M will be taught every class. Hi-Five Multi-Sport serves as an introduction to some of the most popular sports in the world!! Boys and girls will learn the fundamentals of each game through various drills and training elements designed specifically for young players. "

MUSICSTART® KEYBOARDING: "LEARN TO READ MUSIC AND PLAY TUNES!"

THE MUSIC PATH

MusicStart® is a patented progressive music learning system that balances fun and development of skills. Using familiar songs, it teaches all the necessary basics to get started playing music. The MusicStart® Keyboard is especially designed for learning. It uses 4 instructive Attachments that vary the challenge from color matching to letter matching to note matching and reading standard musical notation. MusicStart® is preparation for (or a supplement to) playing any instrument and teaches step-by-step problem solving. All materials are provided.
