

Pre Algebra 2020-2021 Summer Assignment

In order to master any skill, one must continually practice. For this reason, the mathematics department at Vanguard College Preparatory School believes it is important for our students to practice their math skills over the summer. Each student must complete the attached review packet and turn it into their math teacher on the first day of school for a grade. If there is a concept your child does not know how to do or cannot remember how to do, a great resource they can use for help is Khan Academy. We are asking each student to create a Khan Academy account using their Vanguard email account. If your child does not yet have a Vanguard email account, please have them use a personal email account. Using the class code provided, we will be able to monitor your student's progress throughout the summer. In addition to the assigned review, we suggest that each student spends about an hour a week on Khan Academy strengthening their math skills.

Please join the following Khan Academy class:

<https://www.khanacademy.org/join/BQZPSY6U>

We recommend you spend an hour a week practicing your skills. Start with the first section and try the quizzes and tests. If there is an area that you need extra practice, you can view the lessons for these.

The Pre Algebra summer assignment can be found here:

Please do your work on a separate piece of paper. Remember, show all your work and always use a pencil.

If you have any questions, please feel free to contact us. We look forward to seeing you in the fall.
