

ATTEND Testimony & Info

I can't thank you enough for all you have done for my son. When I came to you two months ago, my son (age 10) was being tested with the school for having trouble with finishing, focusing, and the quality of his work. The testing was grueling – he was taken out of class many times and then had to make up the work he had missed at recess. After speaking with you my son started taking ATTEND. You recommended that his diet be looked at to make sure that he was eating enough of the right foods to keep him going through the day and recommended he take ATTEND.

After a few weeks we saw a little bit of a difference. Six weeks later it was like the light switch that was never on switched on! His grades in school all went up. For the first time he had all A's and B's. He always had a few C's, which bothered him so much. He came home from school saying that this was the best day of his life. My son noticed he was able to keep up with his class, never feeling behind and different. At home we noticed a big difference; he would look us right in the eye, answer us, and do exactly what we had asked without five reminders. In sports, he was able to focus more. I went into his classroom for his Valentine's Party, and his teacher pulled me aside and told me how wonderful he was doing in school and then apologized for recommending he go through the testing. She said, "I don't know what happened, but if he follows along this path he will have no problem all of his school years." I can't tell you how happy this makes his father and me. As parents you want to do the best for your kids, and I was at a loss as to how to help him. He is such a sweet kid, and he always saw himself as different from everyone in his class – NOT ANY MORE. I can't tell you how that makes a parent feel. Thank you so much for giving my son the ability to be the best that he can be. Cindy Butler – Windham, NH
