

# Fighting COVID-19

## Back-to-School Resources

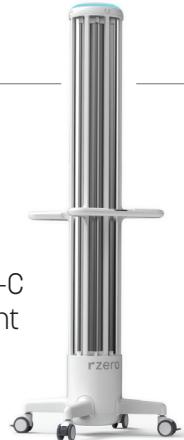

### Crisis-Go

IASA has partnered with CrisisGo for years on technology school districts can utilize to improve school safety. In response to new IDPH guidelines for the 2020-21 school year, we asked CrisisGo to develop a tool districts can use to assist with the pre-certification of staff and student temperatures and help protect against the spread of COVID-19. Click [here](#) to learn more about the new CrisisGo's Safety iPax.

### R-Zero Systems—Smart Disinfection Devices

The R-Zero UV-C Device is one option school leaders should consider to address concerns about keeping classrooms and other spaces disinfected in order to reduce the transmission of pathogens and the diseases they cause – from the coronavirus to the cold. The R-Zero UV-C Device is a touch-less, whole room disinfection, hospital-grade UV-C light capable of disinfecting the surfaces and air of today's most dangerous pathogens. If your school district is interested in testing students or staff for COVID-19, here are two options to consider:

#### Rapid Response Antibody Test Kit

- 10-Minute Test Results
- 24-Month Self Life
- Dual band results for simple interpretation
- The COVID-19 Test is self-contained, requires no machine or lab to read the results, and it can be self-administered under the supervision of healthcare professionals.

#### PCR—Saliva Swab Test

- Return Results in 24-72 hours
- Infection tracking and reporting
- 99.9% Accuracy for RT-PCR Viral Testing
- 95% Sensitivity for Antibody Testing
- Kit includes all equipment for administering test and return shipping label.

### Gold Shield Disinfectant

IDPH guidelines require increased cleaning of buildings if students return to in-person learning. One option for school leaders to consider is Gold Shield Technologies. The company has a series of products that can keep surfaces disinfected longer than traditional cleaning products. Gold Shield cleaning products are non-flammable, water stable and UV resistance.
