

Acalanes Union High School District (AUHSD) Free COVID-19 and Tdap Vaccine Clinics

All Californians age 12 and older are now eligible to get a safe, effective, and no-cost COVID-19 vaccine. In addition, free Tdap vaccines are also available to anyone age 7 and up. While the COVID-19 vaccine is currently not a requirement to attend public school, I hope all our eligible students will get vaccinated. The Tdap booster shot is required of all seventh grade students before starting school.

To make COVID-19 and Tdap vaccination more convenient to our community, AUHSD is partnering with Contra Costa Health Services and hosting vaccination clinics at Acalanes High School in Lafayette and Las Lomas High School in Walnut Creek:

Acalanes High School – June 1 – June 5

Las Lomas High School – June 8 – June 12

The COVID-19 vaccine and the Tdap booster shot will both be available. Per the CDC and American Academy of Pediatrics, it is safe to get COVID vaccine and other vaccines at the same time. You can make appointments 7 days out through the **CCHS scheduling website**. (June 1 and June 2 are available now, and a day is added each day. So Las Lomas appointments for June 8 will be available beginning June 1).

COVID-19 Vaccine

The parents of students under the age of 18 must complete a **consent form** for the student to receive the COVID-19 vaccine. Additionally, a **screening form** should be completed. Parents should review the **Pfizer fact sheet**. If you have concerns regarding the safety of the COVID-19 vaccine for your student, we encourage you to consult with your healthcare provider.
