### MONTHLY COMMENTARY

Payroll data for the second quarter of 2018 from nearly all of the state's employers was recently posted on our website (<https://lmi.delawareworks.com/Content/Information/QCEW.php>). Known as the Quarterly Census of Employment and Wages (QCEW), it is easily the best count of jobs in Delaware. While the survey-based Nonfarm Employment estimates published in this review are a little more timely, they are also more subject to error and can deviate substantially from the payroll data, requiring them to be benchmarked to the QCEW at the beginning of each year.

The QCEW shows solid growth of 6,833 jobs overall from the second quarter of 2017 to the second quarter of 2018, with about a third of that in the Accommodation and Food Services sector. That growth has not been picked up by the surveys. Another surprise was a gain of over 1,100 jobs in Manufacturing, where the survey-based estimate showed a gain of 33 jobs. The biggest gains were in poultry processing, but perhaps more notable were the widespread small job gains across a large number and variety of manufacturers. Another change that was mostly picked up in the surveys was a 10% drop in Information jobs, which include media and data processing.
