PARENTING HELP OPPORTUNITY!

The Center for Children and Families of WNY is conducting a study aimed at enhancing family support, and we invite you to be a part of it! Join fellow caregivers in a program designed to assist children in achieving greater success in their everyday activities, both at home and in school.

Receive $50 for your participation

Participating families will engage in a five-week program conducted over Zoom. During each session, caregivers will connect with others to explore and acquire a new skill each week. The best part? Participation is entirely free of charge! Additionally, caregivers will receive a $50 reward for completing study questionnaires both before and after the group sessions.

Your involvement is crucial in shaping the success of this program, and we believe it will not only benefit your family but also contribute valuable insights to our ongoing research. We look forward to your participation in this enriching journey.
