

At Multicyl we are taking the situation of COVID-19 Coronavirus very seriously, therefore effective immediately we are implementing a Multicyl COVID-19 protocol.

The main reason for this is to protect all Multicyl employees, customers & suppliers. We also want to assist Health Canada in containing the virus as quickly as possible.

Upon arriving at work all employees must wash their hands for at least 20 seconds with soap and water. Also, upon handling of incoming or shared materials employees must wash their hands with soap and water for 20 seconds.

Any employee displaying symptoms of COVID-19 (dry cough, sore throat, fever or difficulty breathing) should not come to work. It will also be strongly suggested that you visit a COVID-19 evaluation centre as soon as possible.

Please do not allow any employees & visitors into the building that have not been approved. Any visitors must arrive through the front entrance and will be dealt with in the visitor's area and Multicyl employees shall not come within 1 meter of the visitor.

Where at all possible meetings will take place via telephone or over the internet, and any in-house meetings will be by appointment only.

This protocol will be part of our daily routine until further notice.

If symptoms begin during your shift, please notify your supervisor immediately.

If you leave the building for any reason, please ensure proper hand hygiene protocol is always followed upon re-entry.

This information will be updated as new information from Health Canada becomes available.

There is nothing more important than the health and safety of all of our employees and their families. Your mandatory adherence to these protocols will ensure everyone's protection.
