

You're probably aware that the General Data Protection Regulation (GDPR) will come into force on 25th May and we all need to be compliant. You may have already appointed a Data Protection Officer and/or have your policies in place. However, is everyone aware of their own GDPR responsibilities? Staff training is a crucial part of protecting data privacy and is required under Article 39 of the GDPR.

IACT can offer the following solutions:

Online GDPR Implementation Toolkit (for those responsible for implementing GDPR) which includes:

- A step-by-step guide to becoming compliant
- 11 Mandatory Policies & Procedures that can be downloaded as templates and adapted for your business.

Online GDPR eLearning course for employees:

- This course explains to all employees what the GDPR is, how it impacts them, and actions everyone should be taking when processing protected data.
- The course takes 30 minutes to complete.
- Employees watch the course, take the assessment and get Certified.
- The course has been signed off and approved by DPOs.

Tracking and Reporting

- As an Owner/Manager you will be able to view the course progress of each employee.
- The Reporting gives you evidence that your people have been trained, should a data breach occur.

The solution is used by some of the largest data-processors in the state to train all their employees, such as An Post, Tusla, Dept of Employment affairs, Pensions Authority, and multiple other Businesses small and large.

A link to the demo is below which will give you a better idea of this offering
