Postdoctoral Position in Ocean Modeling at UCLA

We are seeking a postdoctoral researcher with expertise in ocean modeling to join a project aimed at investigating physical-biogeochemical interactions along the U.S. West Coast and in the Pacific Ocean. The successful candidate will join J. McWilliams and D. Bianchi’s groups at University of California Los Angeles, and work on development and application of Regional Earth System Models to a wide range of questions in physics, biogeochemistry and ecosystem. Applicants should have a Ph.D. in Atmospheric and Oceanic Sciences or a related field, effective oral and written communication skills, and familiarity with numerical ocean circulation/biogeochemical models. Experience with ROMS or similar models, Matlab/Python is strongly encouraged. Candidates should submit a CV, a 1-page statement of research interests and goals, and contact information for up to 3 references to Daniele Bianchi (dbianchi@atmos.ucla.edu). Review of applications will begin immediately and continue until the available positions are filled. The initial term of appointment is one year, renewable on an annual basis.
