

Pre-Employment Screening Program
Federal Motor Carrier Safety Administration

TEN YEARS OF IMPROVED SAFETY ON AMERICA'S ROADWAYS

2010 - 2020

INFORMED DECISION MAKING

By offering immediate access to a driver's five-year crash history and three-year roadside inspection history, PSP informs hiring decisions that lead to improved commercial motor vehicle safety on America's roadways.

Reviewing a driver's crash and inspection history can help identify red flags like:

- Phone use or texting while driving
- Speeding
- Hours of service violations

"The information in a report can help us understand not only moving violations and accidents, it helps us identify drivers that have a strong vehicle inspection practice... The PSP report is invaluable in preventing bad hires that were difficult to determine previously."

– Victor Hart, Dot Foods

A DECADE OF DISTINCTION

Improved Roadway Safety

An FMCSA study found that **motor carriers using PSP**, on average, **experience 8% fewer crashes and 17% fewer out-of-service incidents** than motor carriers not using PSP in their hiring process.

Expanded Access to Data

Motor carrier feedback prompted the inclusion of **background screening companies** as users of PSP and in 2012, they **gained access to PSP data** enabling them to help motor carriers hire drivers.

Modernized Technology Approach

PSP technology stays up-to-date with the latest industry trends ensuring that you will **receive PSP data quickly, reliably, and securely.**

Focused Customer Care

Offering **toll-free phone support, email, chat, and even co-browsing**, PSP's customer service team assists individuals in the manner they prefer—**answering questions 99% of the time** without escalation.

Recognized Success

In its ten-year history, **PSP's commitment** to public service, innovation, and customer service has been **recognized with 22 national awards.**

Reduce the risk of hiring an unsafe driver by joining the thousands of motor carriers already using PSP.
