RTS Digital Partyline intercom Meet OMS (OMNEO Main Station) & DBP (Digital Beltpack)

- OMS is a uniquely versatile and cost-effective solution capable of interconnecting both wired/wireless and IP/digital/analog devices.
- DBP is a four-channel/four-button wired beltpack that runs on PoE and connects using OMNEO IP technology. Its unique hybrid design supports both digital partyline and matrix keypad modes.
- The session will focus on the wide range of verticals RTS Digital Partyline can address, such as theater, house of worship, and small broadcast.
