

Dear Valued Customer,

We would like to invite you to participate in our upcoming virtual RTS spring showcase and webinar program – a great opportunity for you to learn more about what's new and what's next from RTS, presented by members of the RTS team:

Shawn Anderson, Application Design Manager | **Greg Compagnone**, Sales Director
Doug Heinzen, Product Marketing Manager | **Amauri Ramos**, Training Manager

A different session is offered every day, each taking a deep dive into a different area of products and technology (details below). Each of these sessions will follow an introduction with topics including:

- Why being part of the Bosch Group makes a difference
- VLink – a remote communications solution for the current situation
- What's new from RTS? A quick overview of our latest products and technologies... and what's coming soon
- Introduction new professional-level training modules for RTS
- Q&A: talk to the team – let us know how RTS can provide a solution for your next project.

To register for a session, please visit the following link:

WIRELESS SOLUTIONS MON APR 20: 1-2 PM CST

An overview of the industry's broadest wireless intercom portfolio. Focus on the new BTR-30N two-channel narrow-band UHF/VHF wireless system, the latest addition to its extensive professional intercom portfolio. The system's hybrid dual-band UHF/VHF design makes it a flexible and user-friendly choice for today's changing and shrinking RF environment – reliable, high-performance, high-fidelity communications delivered with minimum spectrum usage. New frequency band options for UHF BTR wireless will also be covered.

INDUSTRY STANDARDS TUE APR 21: 1-2 PM CST

RTS works with ALL industry-leading standards, protocols and connection types: AES67, AES70, ST 2110, VOIP, G.711, G.729, G.722, Dante, 4W analog ... and more. We're a committee member and driver of new standards, including SMPTE 2110-30, SIP, and AES – this session will share the info that you need to get up to speed on the latest standards and emerging technologies, and how they can work together with existing equipment.

With special guest:
Ethan Wetzell, Platform Strategist

ODIN (OMNEO DIGITAL INTERCOM) WED APR 22: 1-2 PM CST

Where previous-generation digital matrix products were significantly larger and more costly to own and operate, ODIN's feature set and form factor are designed to make a professional matrix solution more accessible and easier to use than ever before, opening up the benefits of highly scalable and interoperable IP-based communications for wide range of new markets and users of all levels. This session will also cover ROAMEO DECT-based wireless digital beltacks and the latest KP series IP keypanels – perfect peripheral products for the ODIN ecosystem.

VLINK DEMO THU APR 23: 1-2 PM CST

Remote production for the world we live in today. VLink is a fully interconnected software application that enables remote users to interface with RTS matrix intercoms, allowing an unprecedented degree of control and flexibility from anywhere in the world – including your home. With VLink, your mobile device can serve as your own wireless intercom keypanel.
