

## Telex Radio Dispatch and Network Recording

Telex Radio Dispatch discontinued the NR-V3 IP Network Recorder as an available option to your system in 2015. Over the past couple years we have worked with a number of 3<sup>rd</sup> party recording solutions vendors in order to make the recording of our proprietary data streams possible. We do not currently have a test and certification program to verify claims made by any of these vendors. That said, we do attempt to answer technical questions brought to us by the recording companies that have opted to include our protocol in their product.

Our official position on the topic of recording solutions is that it is up to the buyer to fully investigate any potential recording solution against others in the market. As such, the table on the back of this document should not be considered an endorsement of any given company, but simply a list of companies that have access to the portion of our protocol necessary for recording our Telex RoIP data.

WORKS FOR **YOU.**
